Executive Summary

This report summarizes Barr Engineering Company's Phase I Environmental Assessment (Assessment) of the Capp/Vandalia Property (Property) in St. Paul, Minnesota. The Property consists of an 8.5-acre parcel of land with one trailer office. Barr performed this Assessment in August and September 1997 in conformance with the American Society for Testing and Materials (ASTM) Practice E 1527-97 (Practice). Special terms, conditions, limitations, and exceptions that apply to the Assessment are described in the following pages.

This Phase I Property Assessment did not include a Property inspection; therefore, the opportunity to identify environmental conditions at the Property was limited. The following report is based strictly on information that is part of the public record (aerial photographs, historical Sanborn Fire Insurance Maps, Assessor's records, etc.).

The Assessment revealed no evidence of recognized environmental conditions in connection with the Property, except for the following conditions:

- This Property was used as a railroad repair department between at least 1927 and 1967. It is likely that oils, greases, and solvents were used at the Property.
- An "oil tank" was identified west of Building A on the 1967 Sanborn Insurance Map. The capacity and content of this tank are
- Assessor's records show that the Property was leased by Lyon Chemical Company from Minnesota Transfer Railway Company in 1968. The Property was reported to contain three 19,000-gallon tanks of liquid calcium chloride and one 12,000-gallon tank of anhydrous ammonia. The Assessor's records indicate that road salt was manufactured on the Property.
- Industrial activities in close proximity to the Property have included pole treating, filling, railroad yard, and manufacturing.

Based upon the results of this Assessment, further investigation of the Property is recommended.

Signatures and Qualifications

Barr Engineering Company conducts environmental assessments for industrial clients involved in property and business transactions. Clients include mortgagors, attorneys, developers, and private and public parties interested in selling, purchasing, or redeveloping property. Many projects are initiated by clients who are buying or selling property or who are required to conduct an environmental assessment for financing purposes. Other projects are initiated by clients who suspect that contamination may be present on a site. Still other projects are in response to orders from regulatory agencies. Barr works for clients in both the public and private sectors, and clients range from major industries to state and federal agencies.

Barr has specialized in the investigation and design of remedial actions for contaminated sites since the early 1970s. Our company has completed hundreds of site investigations, feasibility studies, and remedial action designs. This experience includes work on most of the larger contaminated sites in Minnesota as well as numerous smaller sites. Barr has been a primary consultant on about two-thirds of the EPA National Priority List sites in Minnesota and has been involved in either a primary or secondary role on about half of the sites listed by the state of Minnesota. Barr's work on virtually all of these sites has been on behalf of potentially responsible parties. We have worked on contaminated sites in many other states as well.

Barr has worked on a variety of sites, including: steel and coke manufacturing, wood treating, petroleum refining, manufacturing (paint waste/spent solvents), coal gasification, mining and mineral processing, petroleum product storage (above- and belowground), metal plating, scrapyards, landfills, and permitted and nonpermitted waste disposal facilities.

The qualifications of the individual Barr personnel who performed the Assessment are in Appendix A. Ms. Janet B. Dalglish managed the project and Ms. Ellen Richard conducted and prepared the Assessment.

Project Manager

Environmental Professional

Introduction

This report presents the Assessment of the Property known as the Capp/Vandalia Property. The Property is located in the southwestern portion of the St. Paul, Minnesota, owned by Donald G. Oren, and leased to Carl Bolander & Sons Company. The Carl Bolander & Sons Company operates a concrete reclamation business at the Property. The location of the Property is shown on Figure 1. This Assessment was prepared for the Minnesota Pollution Control Agency (MPCA) for the purpose of determining if available historical and regulatory information suggest the likely presence of an existing release, a past release, or a material threat of a release of hazardous substances or petroleum products on the Property. The responsibilities of the user of this report, cited in Section 5 of the Practice, apply.

Special Terms and Conditions

This report is prepared for the exclusive use of the MPCA. The purpose of this report is to aid in the environmental assessment of the Property. The Assessment did not evaluate the structural condition of the buildings, asbestos, environmental regulatory compliance, or other features of the Property.

Barr has performed its work in a manner consistent with the care and skill ordinarily exercised by members of the environmental profession under similar budget and time constraints. Within this context, Barr assumes responsibility for its own observations, along with its interpretation of the information gathered. No other warranty is made or intended.

Since Barr was not retained to verify information, Barr assumes no responsibility for the accuracy of information that it obtained from other sources, including, without limitation, regulatory and government agencies, persons knowledgeable about the Property, and vendors of public data. To the extent that Barr does not identify contamination or potential sources of contamination to the Property in this report, Barr's conclusions in the report are not representations that the Property is free of contamination. The Property may have contamination that was not discovered due to the scope of this investigation or other circumstances. Under no circumstances can Barr represent or warrant that hazardous or toxic materials do not exist on the Property.

Acquisition and review of recorded land title information, information regarding the presence of environmental liens, and Property owner interviews were not within the scope of the Assessment. Except for these exceptions, no intentional deviations from ASTM Practice 1527-97 were made.

Property Description

The Property is located north of the intersection of Capp Road and Vandalia Street in the city of St. Paul in Ramsey County, Minnesota. The Property is located in the southwest portion of St. Paul and is owned by Donald G. Oren and leased to Carl Bolander & Sons Company. The Property consists of approximately 8.5 acres of land that is located in the east-central portion of Section 29, Township 29 North, Range 23 West. The location of the Property is shown on Figure 1. The Property is currently occupied by an office trailer (established on the Property in 1996).

The Property is located in an industrial area of St. Paul, where the primary land use is mixed industrial, warehouses, and railroad. Land to the north of the Property is full of railroad tracks. Land to the west, east, and south of the Property is mixed industrial with warehouses.

Geology

Most of this region has an elevation of approximately 900 to 950 feet above mean sea level. Surface elevations in the vicinity of the Property are approximately 900 feet above mean sea level. The regional ground surface in the vicinity of the Property is relatively level and developed. The landscape of southwest Ramsey County in the vicinity of the Property is the result of mixed glacial outwashes and till that range in thickness from 100 to 150 feet. The surficial soil in the immediate vicinity of the site is a glacially deposited till which has been eroded and streamlined by running water. The till ranges from loamy sand to clay. The soil is gray and oxidizes to yellow brown and may contain bands of reddish-brown Superior till or sand. Depth to bedrock is anticipated to be approximately 100 feet (Meyer and Swanson, 1992).

The glacial deposits in the vicinity of the Property overlies a sequence of Ordovician, Cambrian, and Precambrian sedimentary bedrock. The uppermost bedrock unit is the Platteville and Glenwood Formation which is Ordovician in age. This Formation is underlain by the following, in descending order: the Ordovician formations (St. Peter Sandstone and the Prairie du Chien Group); the Cambrian formations (Jordan Sandstone, St. Lawrence Formation, Franconia, Ironston, Galesville, and Eau Claire); and Precambrian sandstone, shale, and conglomerates (Meyer and Swanson, 1992).

Groundwater

There are three major aquifer systems in the region: (1) sand and gravel deposits within the glacial tills and outwashes, (2) the Platteville Formation, and (3) the Cambrian-Ordovician Aquifer consisting of the Prairie du Chien Group and the Cambrian sandstones. The primary regional aquifer is the Prairie du Chien-Jordan Aquifer.

The anticipated groundwater elevation beneath the Property is approximately 875 to 890 feet MSL. Therefore the depth to groundwater is expected to be 10 to 25 feet. The regional direction of groundwater flow in the surficial deposits in the area of the Property is expected to be to the southwest toward the Mississippi River.

Water Supply

The city of St. Paul relies primarily on surface water from the Mississippi River for water supply. Approximately 15 million gallons a day are taken from the river via a chain of lakes in the North Oaks area. Back-up water supplies are Lino Lake and four wells. Three of these wells are located immediately south of Vadnais Lake and the fourth is located one mile south of the lake. The wells are approximately 450 feet deep. Groundwater at the site does not flow toward these municipal water supplies.

Receptor Survey

Fifteen water supply wells were located between the Property and the Mississippi River downgradient of the Property. Twelve of the wells are industrial or commercial wells. These wells range in depth between 345 and 859 feet and are finished primarily in the Prairie du Chien and Jordan aquifers. One well is identified as domestic and is 500 feet deep (Prairie du Chien-Jordan). One well is identified as public supply and is 340 feet deep (Prairie du Chien Group). The use of the final well is not specified; however, based on the depth and well owner, it is believed to be a monitoring well. The locations of these wells are shown on Figure 2 in Appendix B and are summarized on the attached Table 1.

Based on the date of connection to the municipal water supply (1996), it is likely that a water-supply well exists on the Property. However, no records documenting the existence of a well were located.

Historical Review

Historical Information

Property historical information was obtained from interviews with St. Paul utility department employees; aerial photographs (1940, 1953, 1957, 1966, 1968, 1978, 1980, 1985, 1987, 1991, 1996); and United States Geological Survey topographic maps (1896 (reprinted 1928) and 1967 (photo revised 1972, photo inspected 1977, and revised 1993)). Data gathered from these information sources are summarized on the Phase I Checklist which is included as Appendix B.

Records for the construction and demolition of three buildings are recorded for the Property. Building A was reportedly constructed in 1951 and building B in 1948. The construction date for building C was listed as "old" by the Assessor in 1967. All three buildings were demolished in 1985.

Railroad tracks are shown on the Property on the 1896 historical topographic map. The Sanborn Insurance Maps for 1927 and 1950 indicate that the Property was occupied by Minnesota Transfer Railway Co's. repair department. Five buildings with areas greater than 1,500 square feet are shown on the southern boundary of the Property. These buildings are labeled as "lumber," "brake dept.," "carpr.," "compressor & steam pump," and "store rm." The size and location of the "store rm." is consistent with the building identified as Building C in later Assessor's reports. One of the large buildings contains a steam boiler. In addition to these larger structures, ten small buildings are shown. One is labeled "w.c." (water closet) and two are labeled "scrap iron." The remaining small buildings are not identified. One round structure is shown on the Property and identified as "w.t." (water tank or water tower). The area north of the buildings is identified as "full of tracks."

The 1967 Sanborn Insurance Map indicates that the Property was still occupied by Minnesota Transfer Railway Co's. repair department at that time. One long west-east oriented building is seen. This building is divided into several rooms and is labeled as "store room." The size and location of the "store room" is consistent with the building identified as Building C in later Assessor's reports. One building shown at the location of Building A was identified in later Assessor's reports. The identification labels in this building could not be deciphered. An "oil tank" is shown immediately west of Building A. Four additional small buildings are shown on this 1967 map that are not identified on aerial photographs or on Assessor's records. The area north of the buildings is identified as "full of tracks."

In 1968, the Assessor's records show that the Property was leased by Lyon Chemical Company from Minnesota Transfer Railway Company. The Property was reported to contain three 19,000-gallon tanks of liquid calcium chloride and one 12,000-gallon tank of anhydrous ammonia. The tanks were reportedly constructed in 1965, though they were not identified on the 1967 Sanborn Insurance Map. The Assessor's records indicate that road salt was manufactured on the Property.

The 1977 to 1980 Assessor's records show that the Property was owned by Minnesota Transfer Railway Co. and leased by Van Waters and Rogers. It is not known what was done on the Property during this time period. Assessor's records indicate that the Property was vacant from 1980 to 1996. Assessor's records dated March 8, 1985 state that Gary W. Flanders is the owner of the Property and that he purchased the Property in May 1980. Other records state that Donald G. Oren is the Property owner between 1980 and at least 1995.

The Assessor's records show that the Property was leased to Great Lakes Container in 1991. It is not known what was done on the Property during this time period. The January 6, 1995 Assessor's record shows that the Property was leased to Carl Bolander & Sons for concrete reclamation business and on June 26, 1996 a permit for an office trailer was granted.

According to the city of St. Paul, the water main west of Vandalia was connected in 1973/1974 and the water main east of Vandalia was connected in 1993. Municipal water was connected to the Property in 1996. Sanitary and storm sewer was available in 1973 for the Property. Sanitary sewer was connected to the Property in January 1996. Based on the date of connection to the municipal water supply and the sanitary sewer, it is likely that a water-supply well and septic system existed on the Property in the past. However, no records documenting the existence (or abandonment) of a well or septic system were located.

No records indicating the current or former existence of underground storage tanks on the Property were located.

Regulatory Records

Regulatory records reviews were obtained from Environmental Data Resources, Inc. (EDR) and from the Minnesota Pollution Control Agency (MPCA) (Appendix B). EDR prepared their report and the MPCA prepared the Property Transfer File Evaluation (PTFE) for the Property and surrounding area on August 7, 1997. EDR uses five ASTM federal database lists, ten non-ASTM federal database lists, four ASTM Minnesota database lists, and eleven non-ASTM State of

Minnesota database lists. The PTFE searched two ASTM federal database lists, one non-ASTM federal database list, four ASTM Minnesota database lists, and ten additional State of Minnesota database lists. The EDR and PTFE searches for this Property met the specific requirements of the Practice, including those associated with governmental databases, search distance, and data accuracy. Although the completeness of the data is dependent on the database, the EDR report indicates that all the state and federal database lists included in their search had been updated in compliance with the Practice.

According to the EDR and MPCA PTFE reports, the Property is identified on the Resource Conservation and Recovery Information System (RCRIS) as a small-quantity generator (EPA ID Number MND985712496). The Property was also identified as having an MPCA Air Quality Division permit. Maps showing locations of the properties identified below are in Appendix B.

The EDR report identifies several properties within a 0.25-mile radius of the Property as being included on one or more of the state and/or federal databases. No National Priority List (NPL, also called federal Superfund list) or Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) are identified within 1.00 mile of the Property. Eight state-listed hazardous waste sites identified for investigation or remediation (NPL or CERCLIS equivalents), landfill, solid waste disposal sites, and/or VIC Program sites were identified within 1.00 mile of the Property. A total of 15 leaking underground storage tank (UST) sites are located within 0.5 mile of the Property. One UST site and six RCRIS-Small Quantity Generators are located adjacent to the Property.

All sites found and listed by the EDR and/or PTFE database searches are downgradient from the Property.

Property Inspection and Interview

No Property inspection was conducted for this Phase I Assessment. The Property owner did not grant permission to conduct an inspection. Nor did the Property owner agree to be interviewed.

Conclusions

This Phase I Property Assessment did not include a Property inspection; therefore, the opportunity to identify environmental conditions at the Property was limited. These conclusions are based solely on observations from aerial photographs, historical Sanborn Fire Insurance Maps, and Assessor's records.

This Phase I Property Assessment revealed no evidence of recognized environmental conditions at the Property, except for the following:

- This Property was used as a railroad repair department between at least 1927 and 1967. It is likely that oils, greases, and solvents were used at the Property.
- An "oil tank" was identified west of Building A on the 1967 Sanborn Insurance Map. The capacity and content of this tank is not known.
- Assessor's records show that the Property was leased by Lyon Chemical Company from Minnesota Transfer Railway Company in 1968. The Property was reported to contain three 19,000-gallon tanks of liquid calcium chloride and one 12,000-gallon tank of anhydrous ammonia. The Assessor's records indicate that road salt was manufactured on the Property.
- Industrial activities in close proximity to the Property north, south, and east of the Property, including pole treating, filling, railroad yard, and manufacturing.
- Based on the date of connection to the municipal water supply (1996), it is likely that a water-supply well and septic system existed on the Property in the past. However, no records documenting the existence (or abandonment) of a well or septic system were located.

Based upon the results of this Assessment, further investigation at this Property is recommended.

Barr Qualifications

JANET B. DALGLEISH
Hydrogeologist

Experience

Ms. Dalglish's hydrogeological experience includes remedial investigations, feasibility studies, and remedial actions. She rejoined Barr in 1992 after working several years as a hydrogeologist at the Minnesota Department of Health and the Minnesota Pollution Control Agency. Ms. Dalglish's recent experience includes the following responsibilities:

- Lead project reviewer of remedial investigation and remedial action documents for former manufactured gas plant sites, manufacturing plants and general waste sites. The primary use of information derived from these reviews is for litigation associated with insurance claims, property transfers, and lawsuits.
- Project manager for a remedial investigation of a pesticide processing facility. The remedial investigation was performed for an insurance company. The site was removed from Minnesota's Permanent List of Priorities in 1994.
- Project manager for a remedial design/remedial action plan for an old municipal dump. Remedial actions included stabilization of lead-contaminated soils; a groundwater extraction system for volatile organics; wetland mitigation; and construction of an impermeable cover for the site. Provided expert testimony during deposition for insurance cost recovery.
- Project manager for a manufacturing plant being sued by the landowner for a solvent release on an adjacent parcel of the property. Provided assistance to attorneys during deposition of fact witnesses.
- Project manager for investigation of properties with former manufactured gas plants. Tasks include researching regional hydrogeology and preparing preliminary site assessments for sites in Nebraska, Michigan, and Wisconsin.
- Project manager overseeing RCRA facility investigations and groundwater monitoring at a petroleum refinery.
- Project manager for reviewing site investigations and remedial actions at two wood treating plants in a suburban community. Both sites are on the NPL. Barr is working with the city to develop and implement a long-range plan for the area.
- Task manager for a variety of groundwater remediation system, leachate collection systems and long-term monitoring programs. Typical sites include a metal plating company, landfills, and manufacturing companies.

Janet B. Dalglish (cont.)

Ms. Dalglish was a hydrogeologist supervisor at the Minnesota Department of Health for two years, and a senior hydrogeologist at the Minnesota Pollution Control Agency for three years. She served as lead state hydrogeologist for the Twin Cities Army Ammunition Plant site and the Lakeland groundwater contamination site, the most extensive groundwater contamination sites in Minnesota. Ms. Dalglish was previously employed at Barr Engineering from 1985-1987, when her work focused on designing monitoring systems for karst environments.

ELLEN K. RICHARD
Geologist

Experience

At Barr, Ms. Richard has managed and completed project work for a variety of solid and hazardous waste sites, including the following:

- Prepared workplan, interpreted data, and prepared reports for hydrogeological investigations and groundwater monitoring system development at solid waste landfills in Kandiyohi, Jackson, Itasca, and Dakota counties in Minnesota.
- Prepared workplan for soil borings, trenches, and monitoring wells at former locomotive refueling and repair yard in Minnesota with extensive petroleum contamination. Also provided data interpretation.
- Responsible for hydrogeologic characterization and postclosure monitoring of a taconite mine's industrial landfill in northern Minnesota.
- Inspected and logged soil borings and monitoring wells at a former manufactured gas plant contaminated with volatile organic carbons and cyanide in downtown St. Paul, Minnesota.
- Responsible for workplan development and remedial investigation activities to define extensive petroleum contamination at a taconite mine in northern Minnesota.
- Prepared specifications for and inspected the installation of groundwater quality monitoring wells and soil borings and assisted with report preparation for a closed refinery site contaminated with hydrocarbons and metals in northern Minnesota.
- Completed investigative activities at a former manufactured gas plant in Iowa, including inspecting and logging soil borings and monitoring wells and characterizing soils.
- Investigated and defined limits of extensive petroleum contamination in soils at a site in southwestern Michigan, and provided on-site project management during fast-track remedial activities to attain closure of the site.
- Inspected various investigation activities, including hollow-stem auger, rotary, flight auger, and rotosonic drilling methods; HydroPunch groundwater sampling method; test trenching; and down-hole geophysical logging.
- Worked on an underground storage tank management project for the U.S. Postal Service that involved 38 sites in Minnesota. Responsibilities included site visits and a preparation of a report summarizing recommendations to minimize environmental liabilities associated with tank operation and to comply with current tank regulations.

Ellen K. Richard (cont.)

Before joining Barr, Ms. Richard completed a geologic field course in the Rocky Mountains through the University of Indiana/Bloomington. During her schooling, Ms. Richard held an internship with the Minnesota Department of Health. There she helped study the impact of mixed solid-waste facilities on groundwater in the Twin Cities metropolitan area. She also worked for the University of Minnesota Department of Geology.

During her year in the university's Undergraduate Research Opportunity Program, Ms. Richard investigated water quality in the Mt. Simon Aquifer recharge zone in Isanti County, Minnesota.

Phase I Checklist

**Voluntary Investigation and Cleanup
Phase I Checklist
Capp/Vandalia Property
2185 & 2085 Capp Road
St. Paul, MN 55114**

I. Site Information

Property Name: Capp/Vandalia Property

Address: 2185 & 2085 Capp Road
St. Paul, MN 55114

County: Ramsey

Township/Range/Section: Township 29 North, Range 23 West, Section 29

Property Owner: Donald G. Oren leased to Carl Bolander

Property Use: concrete reclamation

II. Physical Setting (topo maps, geologic resources, well logs)

Surface Elevation: 900 ft. MSL

Stratigraphy (soils and upper bedrock units):

The soil in the immediate vicinity of the site is a glacially deposited till which has been eroded and streamlined by running water. The till ranges from a loamy sand to clay. The soil is gray and oxidizes to yellow brown and may contain bands of reddish-brown Superior till or sand. Depth to bedrock is anticipated to be approximately 100 feet. The uppermost bedrock unit is the Platteville and Glenwood Formation which is Ordovician in age.

Anticipated Groundwater Depth/Flow Direction:

The anticipated groundwater elevation beneath the Property is approximately 875 to 890 feet MSL. Therefore the depth to groundwater is expected to be 10 to 25 feet. Groundwater is expected to flow to the southwest toward the Mississippi River.

Regional Aquifer:

The primary regional aquifer is the Prairie du Chien-Jordan Aquifer. However, it is permissible to install potable water supply wells in the glacial drift and Platteville Formation in the immediate vicinity of the Property.

Municipal/Property Water Supply:

The city of St. Paul relies primarily on surface water from the Mississippi River for water supply. Approximately 15 million gallons a day are taken from the river via a chain of lakes in the North Oaks area. Back-up water supplies are Lino Lake and four wells. Three of these wells are located immediately south of Vadnais Lake and the fourth is located one mile south of the lake. The wells are approximately 450 feet deep. The city of St. Paul's water supply is not downgradient from the Property.

Receptor Survey:

Fifteen water supply wells were located between the Property and the Mississippi River downgradient of the Property. Twelve of the wells are industrial or commercial wells. These wells range in depth between 345 and 859 feet and are finished primarily in the Prairie du Chien and Jordan aquifers. One well is identified as domestic and is 500 feet deep (Prairie du Chien-Jordan). One well is identified as public supply and is 340 feet deep (Prairie du Chien Group). The use of the final well is not specified; however, based on the depth and well owner, it is believed to be a monitoring well. The locations of these wells are shown on Figure 2 and are summarized on the attached Table 1.

III. Property Land-Use History

Primary Resources

- ☒ Aerial photos (years: 1940, 1953, 1957, 1966, 1968, 1978, 1980, 1985, 1987, 1991, 1996)
- ☒ Sanborn maps (years: 1927, 1950, 1967)
- ☒ Historic topographic maps (years: 1896, 1967, 1972, 1977, 1993)

<u>X</u>	Local fire department records (justification for use/nonuse: <u>St. Paul Fire and Safety Department information requested and no information available for Property</u>)

Original Site Development (year/use):

Railroad tracks are shown on the Property on the 1896 historical topographic map. The 1927 Sanborn Insurance Map indicates that the Property is occupied by Minnesota Transfer Railway Co's. repair department. Buildings are shown on the Property on the 1940 aerial photograph.

Chronology of Use/Ownership (year/use/full name of each owner/years of ownership):

The Sanborn Insurance Maps for 1927 and 1950 indicate that the Property is occupied by Minnesota Transfer Railway Co's. repair department. Five buildings with areas greater than 1,500 square feet are shown on the southern boundary of the Property. These buildings are labeled as "lumber," "brake dept.," "carpr.," "compressor & steam pump," and "store rm." The size and location of the "store rm." is consistent with the building identified as Building C in later Assessor's reports. One of the large buildings contains a steam boiler. In addition to these larger structures, ten small buildings are shown. One is labeled "w.c." (water closet) and two are labeled "scrap iron." The remaining small buildings are not identified. One round structure is shown on the Property and identified as "w.t." (water tank or water tower). The area north of the buildings is identified as "full of tracks."

The 1967 Sanborn Insurance Map indicates that the Property is still occupied by Minnesota Transfer Railway Co's. repair department. One long west-east oriented building is seen. This building is divided into several rooms and is labeled as "store room." The size and location of the "store room" is consistent with the building identified as Building C in later Assessor's reports. One building is shown at the location of Building A as identified in later Assessor's reports. The identification labels in this building can not be deciphered. An "oil tank" is shown immediately west of Building A. Four additional small buildings are shown on this 1967 map that are not identified on aerial photographs or on Assessor's records. The area north of the buildings is identified as "full of tracks."

In 1968, the Assessor's records show that the Property was leased by Lyon Chemical Company from Minnesota Transfer Railway Company. The Property was reported to contain three 19,000-gallon tanks of liquid calcium chloride and one 12,000-gallon tank of anhydrous ammonia. The tanks were reportedly constructed in 1965, though they were not identified on the 1967 Sanborn Insurance Map.

The 1977 to 1980 Assessor's records show that the Property was owned by Minnesota Transfer Railway Co. and leased by Van Waters and Rogers. Assessor's records indicate that the Property was vacant from 1980 to 1996. Assessor's records dated March 8, 1985 state that Gary W. Flanders is the owner of the Property and that he purchased the Property in May 1980. Other records state that Donald G. Oren is the Property owner between 1980 and at least 1995.

The Assessor's records show that the Property was leased to Great Lakes Container in 1991. The January 6, 1995 Assessor's Record shows that the Property was leased to Carl Bolander (612-224-6299) for concrete reclamation business. On June 26, 1996, a permit for an office trailer was granted.

1997 Cole's St. Paul & Suburban directory (EDR-City Directory, August 11, 1997) lists M&N Facility Inc./Multi Mdl Transport at the 2185 Capp Road address. This information is not accurate because the Property is currently occupied by Carl Bolander and Sons Co.

The following is a summary of known activities in which each owner or occupant was engaged:

Minnesota Transfer Railway Company

- Manufacturing processes: Minnesota Transfer Railway Company repair dept. (EDR-Sanborn, 1997)
- Standard industrial codes: unknown
- Raw products used: unknown
- Types and composition of waste streams: unknown
- Disposal methods: unknown
- Hazardous waste streams: unknown
- EPA identification number: unknown
- Hazardous waste manifests: unknown
- Hazardous waste treatment, storage and disposal: unknown
- Hazardous waste enforcement actions: unknown
- Hazardous waste spill or disposal episode: unknown
- Material Safety Data Sheets: unknown

Lyon Chemical Company

- Manufacturing processes: manufacturing road salt (Assessor, 1997)
- Standard industrial codes: unknown
- Raw products used: liquid calcium chloride and anhydrous ammonia (Assessor, 1997)
- Types and composition of waste streams: unknown
- Disposal methods: unknown
- Hazardous waste streams: unknown
- EPA identification number: unknown
- Hazardous waste manifests: unknown
- Hazardous waste treatment, storage and disposal: unknown
- Hazardous waste enforcement actions: unknown
- Hazardous waste spill or disposal episode: unknown
- Material Safety Data Sheets: unknown

Van Waters and Rogers

- Manufacturing processes: unknown
- Standard industrial codes: unknown
- Raw products used: unknown
- Types and composition of waste streams: unknown
- Disposal methods: unknown

- Hazardous waste streams: unknown
- EPA identification number: unknown
- Hazardous waste manifests: unknown
- Hazardous waste treatment, storage and disposal: unknown
- Hazardous waste enforcement actions: unknown
- Hazardous waste spill or disposal episode: unknown
- Material Safety Data Sheets: unknown

Great Lakes Container

- Manufacturing processes: unknown
- Standard industrial codes: unknown
- Raw products used: unknown
- Types and composition of waste streams: unknown
- Disposal methods: unknown
- Hazardous waste streams: unknown
- EPA identification number: unknown
- Hazardous waste manifests: unknown
- Hazardous waste treatment, storage and disposal: unknown
- Hazardous waste enforcement actions: unknown
- Hazardous waste spill or disposal episode: unknown
- Material Safety Data Sheets: unknown

Carl Bolander and Sons Company

- Manufacturing processes: concrete reclamation (Assessor, 1997)
- Standard industrial codes: unknown
- Raw products used: unknown
- Types and composition of waste streams: unknown
- Disposal methods: unknown
- Hazardous waste streams: unknown
- EPA identification number: unknown
- Hazardous waste manifests: unknown
- Hazardous waste treatment, storage and disposal: unknown
- Hazardous waste enforcement actions: unknown
- Hazardous waste spill or disposal episode: unknown
- Material Safety Data Sheets: unknown

Nearby Property Chronology (year, use):

Table 2 is a summary of data from aerial photographs and historical topographic maps.

Table 3 is a summary of the Polk and Cole's St. Paul & Suburban directories (EDR-City Directory) data for surrounding properties.

Land to the north of the Property has been filled with railroad tracks since 1896. Land to the east of the Property was filled with railroad tracks from 1896 to approximately 1978. This land was then developed into industrial/warehouse uses. The land to the west and south has been mixed railroad, industrial, and residential land uses since at least 1940.

The 1927 Sanborn Insurance Map identified the "Page & Hill-Pole Yard and Treating Plant" as being approximately 400 feet south of the Property.

IV. Property Area Regulatory History (EDR report, Property Transfer File Evaluation [PTFE])

Date Regulatory Database Search Performed:

EDR: August 7, 1997

PTFE: August 7, 1997

Was the Property identified on any ASTM regulatory lists searched?

Property was identified on the EDR search under the address 2035 Capp Road. Bolander Carl and Sons was identified as a RCRIS-SQG and under FINDS.

Property was identified as having a MPCA Air Quality Division permit and in the Hazardous Waste Information Management System (EPA ID Number MND985712496) on the PTFE search.

Adjacent/Nearby Property listings (number of sites within ASTM radius area):

<u>0</u>	Federal NPL site list (≤ 1.0 miles).
<u>0</u>	Federal CERCLIS list (≤ 0.5 miles).
<u>2</u>	Federal RCRA TSD list (≤ 1.0 miles).
<u>7</u>	Federal RCRA generators list (property and adjoining properties).
<u>0</u>	Federal ERNS list (property only).
<u>2</u>	State list of hazardous waste sites identified for investigation or remediation (NPL or CERCLIS equivalents) (≤ 1.0 miles).
<u>6</u>	State landfill, solid waste disposal site, and/or VIC Program lists (≤ 0.5 miles).
<u>15</u>	State leaking UST lists (≤ 0.5 miles).
<u>1</u>	State registered UST list (property and adjoining properties).

Potentially Upgradient sites (name, address, regulatory list, relative distance from Property):

All sites found and listed by the EDR and/or PTFE database searches are downgradient from the Property.

V. Previous Environmental Investigations

No known environmental investigations have occurred at the Property.

VI. Property Inspection

The owner of the Property did not grant permission for a Property inspection. No inspection was conducted.

VII. Interviews

Local Government Interview (1)

Date of Interview: August 6, 1997

Local Government Office: St. Paul Water Utility, City of St. Paul

Staff Name: Dave Wagner

Telephone Number: (612) 489-5181

Especially Relevant Information from Interview:

The city of St. Paul relies primarily on surface water from the Mississippi River for water supply. Approximately 15 million gallons a day are taken from the river via a chain of lakes in the North Oaks area. Back-up water supplies are Lino Lake and four wells. Three of these wells are located immediately south of Vadnais Lake and the fourth is located one mile south of the lake. The wells are approximately 450 feet deep.

Local Government Interview (2)

Date of Interview: August 6, 1997

Local Government Office: St. Paul Water Utility, City of St. Paul

Staff Name: Jim Grouptmann

Telephone Number: (612) 298-6894

Municipal Utility Service(s) Availability (date and type):

The water main west of Vandalia was connected in 1973/1974. The water main east of Vandalia was connected in 1993. Water was connected to 2185 Capp Road in 1996. No record of connection was found for 2085 Capp Road.

Local Government Interview (3)

Date of Interview: August 7, 1997

Local Government Office: Public Works, City of St. Paul

Staff Name: Dave Dickhut

Telephone Number: (612) 266-6247

Municipal Utility Service(s) Availability (date and type):

Sanitary and storm sewer was available in 1973 for the Property. Sanitary sewer was connected to 2185 Capp Road on January 11, 1996.

Local Government Interview (4)

Date of Interview: August 27, 1997

Local Government Office: City of St. Paul Dept. of Fire and Safety

Staff Name: Shannon Urhammer

Telephone Number: (612) 228-6264

Especially Relevant Information from Interview:

The city of St. Paul Dept. of Fire and Safety has no file on record for the 2185 and 2085 Capp Road Properties.

VIII. Documentation of Data Failure

No Property inspection was conducted. Current and past owners of the Property were not interviewed.

Records of ownership and land use were not available prior to 1896. Gaps of greater than five years exist between 1896 and 1927, 1927 and 1940, 1940 and 1950, and 1957 and 1966. The Sanborn Fire Insurance maps indicate that the Property use remained the same between 1927 and 1967.

IX. Conclusions

This Phase I Property Assessment did not include a Property inspection; therefore, the opportunity to identify environmental conditions at the Property was limited. These conclusions are based solely on observations from aerial photographs, historical Sanborn Fire Insurance Maps, and Assessor's records.

This Phase I Property Assessment revealed no evidence of recognized environmental conditions at the Property, except for the following:

- This Property was used as a railroad repair department between at least 1927 and 1967. It is likely that oils, greases, and solvents were used at the Property.
- A "oil tank" was identified west of Building A on the 1967 Sanborn Insurance Map. The capacity and content of this tank is not known.
- Assessor's records show that the Property was leased by Lyon Chemical Company from Minnesota Transfer Railway Company in 1968. The Property was reported to contain three 19,000-gallon tanks of liquid calcium chloride and one 12,000-gallon tank of anhydrous ammonia. The Assessor's records indicate that road salt was manufactured on the Property.
- Industrial activities in close proximity to the Property north, south, and east of the Property, including pole treating, filling, railroad yard, and manufacturing.

Table 2
Property and Surrounding Area Development History

Date	Data Source	Observations
1896	Topographic Map	Railroad tracks form southern and northern Property boundaries. No structures are shown on Property. Neither Capp Road nor Vandalia are present. Areas north and east of Property are filled with railroad tracks.
6/25/40	Aerial Photograph	Buildings "A," "B," and "C" are located on the southern edge of the Property. Capp Road appears to be a dirt road. The middle portion of the Property is covered with railroad tracks. The northern portion of the Property is grassed. Land north and east of Property is covered with railroad tracks. Land to south appears to be mixed railroad and industrial with some filling. Building identified as "Page & Hill-Pole Yard and Treating Plant" on 1927 Sanborn Map is present. Land to west appears primarily industrial/warehouses.
10/30/53	Aerial Photograph	Buildings "A," "B," and "C" are located on the southern edge of the Property. Capp Road appears to be a dirt road. The middle portion of the Property is covered with railroad tracks (more tracks than 1940). The northern portion of the Property is grassed. Land north and east of Property is covered with railroad tracks. Land to south appears to be mixed railroad and industrial with some filling. Building identified as "Page & Hill-Pole Yard and Treating Plant" on 1927 Sanborn Map is present. Land to west appears to be primarily industrial/warehouses.
5/10/57	Aerial Photograph	Buildings "A," "B," and "C" are located on the southern edge of the Property. Capp Road appears to be a dirt road. The middle portion of the Property is covered with railroad tracks (same number of tracks as 1953). The northern portion of the Property is grassed. Land north and east of Property is covered with railroad tracks. Land to south and west appears to be mixed railroad and industrial with some filling. Building identified as "Page & Hill-Pole Yard and Treating Plant" on 1927 Sanborn Map is present.
1966	Aerial Photograph	Buildings "A," "B," and "C" are located on the southern edge of the Property. Capp Road appears to be a dirt road. The middle portion of the Property is covered with railroad tracks (same number of tracks as 1953). The northern portion of the Property is grassed. Land north and east of Property is covered with railroad tracks. Land to south and west appears to be mixed railroad and industrial with some filling (more buildings south of the Property than in 1957). Building identified as "Page & Hill-Pole Yard and Treating Plant" on 1927 Sanborn Map is present.
1967	Topographic Map	One building (Building C) is present. The southern half of the Property is covered with railroad tracks. The northern portion of the Property is open. Land to north and east of Property covered with railroad tracks.
1968	Aerial Photograph	Buildings "A," "B," and "C" are located on the southern edge of the Property. The middle portion of the Property is covered with railroad tracks (same number of tracks as 1953), but these tracks appear to be in disrepair. The northern portion of the Property is grassed. Land north and east of Property is covered with railroad tracks. Land to south and west appears to be primarily industrial/warehouses. Building identified as "Page & Hill-Pole Yard and Treating Plant" on 1927 Sanborn Map is present.
1972	Topographic Map	Two buildings are present. The southern half of the Property is covered with railroad tracks. The northern portion of the Property is open. Land to north and east of Property covered with railroad tracks.

Table 2 (cont.)
Property and Surrounding Area Development History

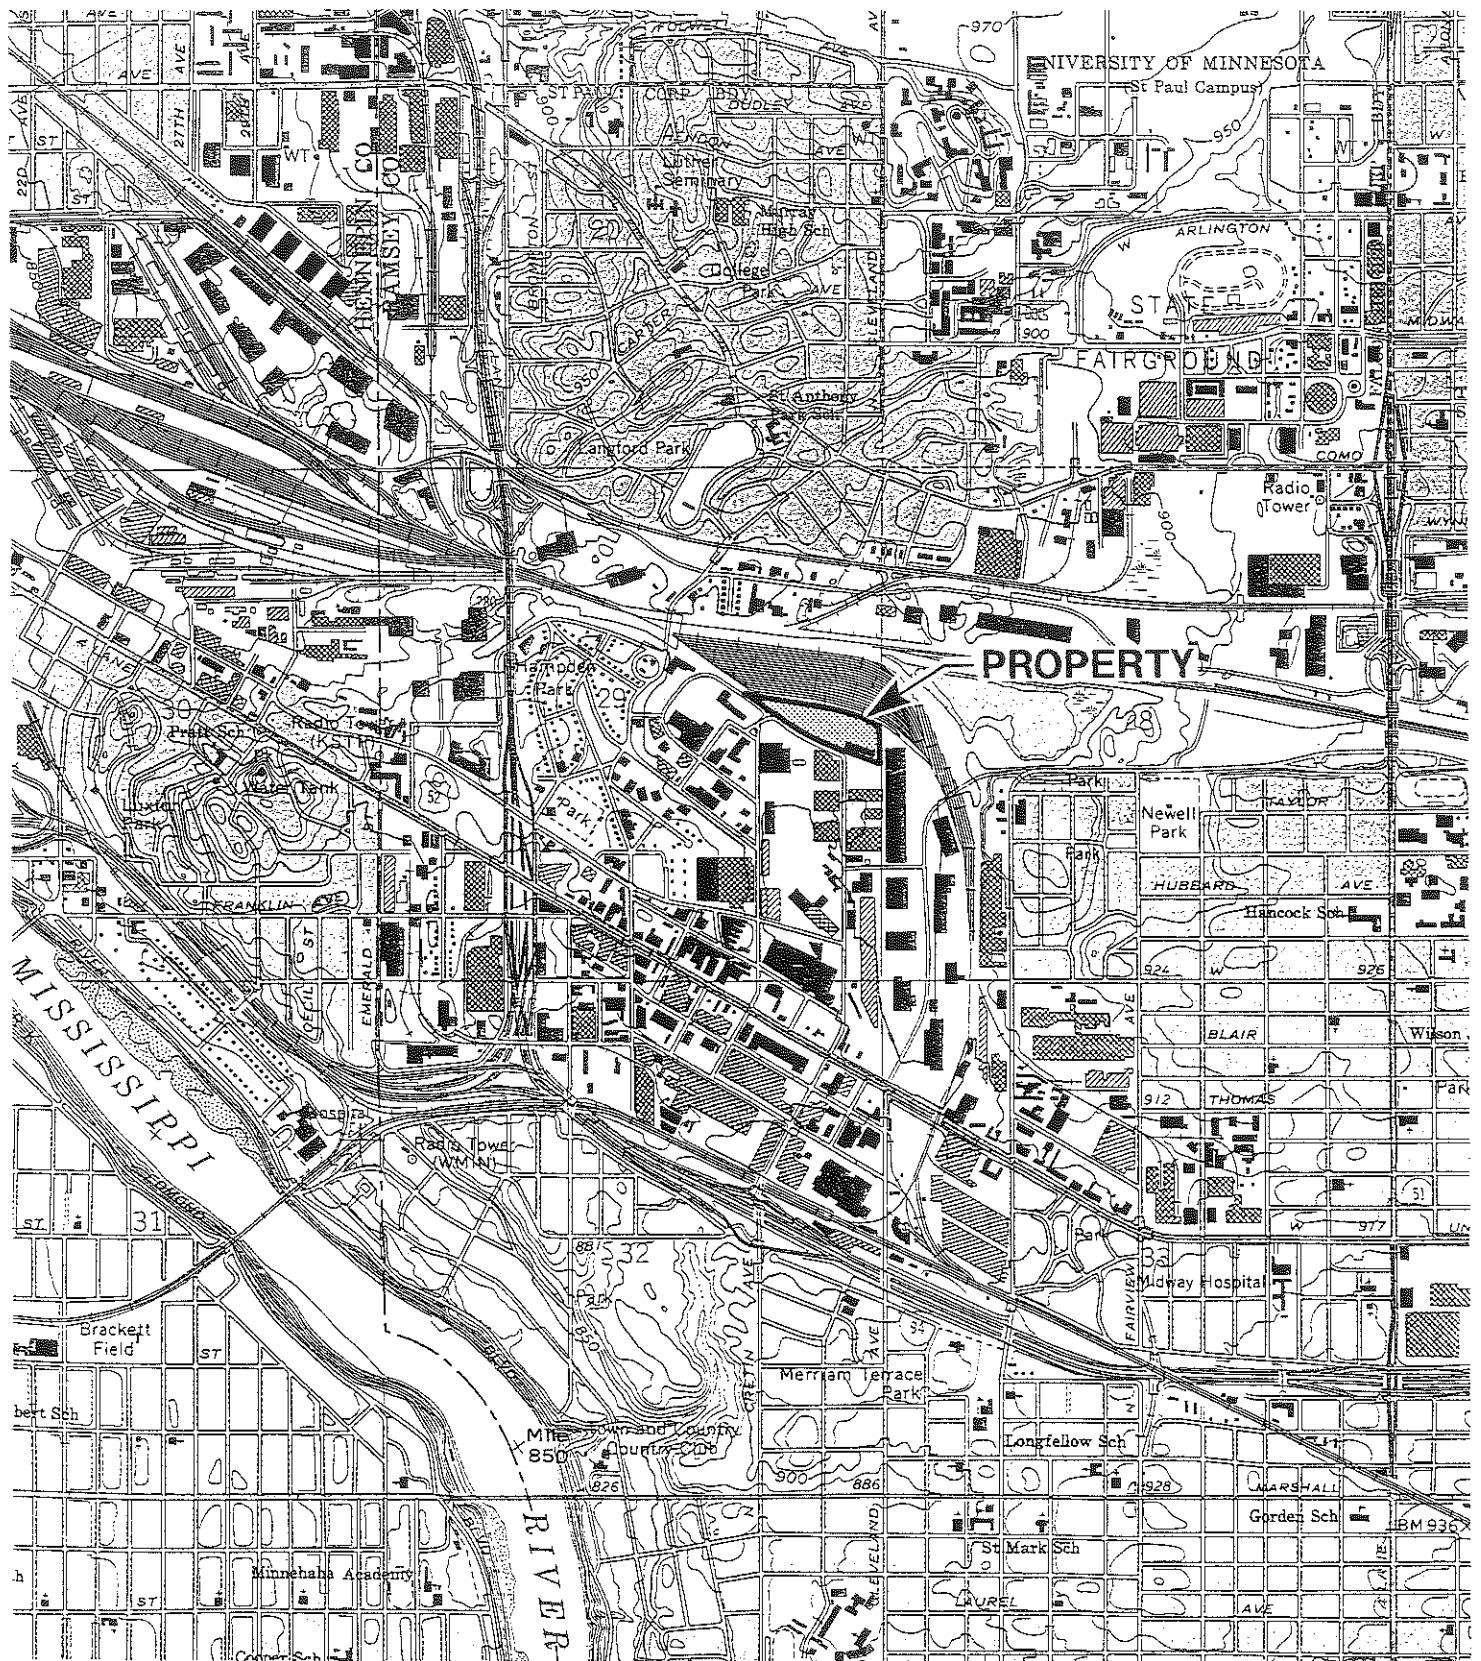

Date	Data Source	Observations
1977	Topographic Map	Two buildings are present. The southern half of the Property is covered with railroad tracks. The northern portion of the Property is open. Land to north and east of Property covered with railroad tracks.
1978	Aerial Photograph	Buildings "A," "B," and "C" are located on the southern edge of the Property. Capp Road appears to be asphalt covered. All former railroad tracks have been removed from the Property. Possible excavation or filling observed in the north-central portion of the Property. Semi trailers are parked on the Property. Land north of Property is covered with railroad tracks. Land east of Property has fewer tracks than historically. Land to south and west appears to be primarily industrial/warehouses. Building identified as "Page & Hill-Pole Yard and Treating Plant" on 1927 Sanborn Map is gone.
4/17/80	Aerial Photograph	This photograph only shows the western half of the Property. No railroad tracks are present on the Property. Semi-truck trailers are parked on the Property. Land north of Property is covered with railroad tracks. Land to west is primarily industrial/warehouses.
4/85	Aerial Photograph	Building "C" is located on the southern edge of the Property. Approximately 12 semi-truck trailers are parked on the Property. Land north of Property is covered with railroad tracks. Land east of Property is not shown on this photograph. Land to south and west appears to be primarily industrial/warehouses.
4/7/87	Aerial Photograph	No buildings are observed on the Property. Possible filling or excavation in the eastern third of the Property (possible conveyor). No semi-truck trailers are observed.
4/17/91	Aerial Photograph	Very small scaled photograph. No buildings are present on the Property. Possible pond observed in western portion of Property. Possible filling or excavation in the eastern and central portions of the Property (possible conveyor).
1991	Aerial Photograph	No buildings are present on the Property. Possible pond observed in western portion of Property. Central area appears to be dirt parking area. Possible excavation or filling in eastern portion of Property (conveyor and earth moving equipment). Land north of Property is covered with railroad tracks. Land east of Property is not shown on this photograph. Land to south and west appears to be primarily industrial/warehouses.
1993	Topographic Map	Two buildings are shown on Property (this is an error). No railroad tracks are shown on Property. Tracks fill area north of Property. Large building shown east of Property. Land to south and west is industrial/warehouses.
5/96	Aerial Photograph	One building (office trailer) is present on Property. The western two-thirds of the site is covered with parked semi-truck trailers. Possible filling/excavating along northern Property line. Eastern third of Property is covered with piles of soil. Land north of Property is covered with railroad tracks. Land east of Property is not shown on this photograph. Land to south and west appears to be primarily industrial/warehouses.

Ms. Jessica Fitzpatrick
Barr Engineering Company
8300 Norman Center Drive
Minneapolis, Minnesota 55437-1026

RECEIVED

AUG 7 1997

**BARR
ENGINEERING CO.**

RE: Property Transfer File Evaluation 2362504/bd401

Dear Ms. Fitzpatrick:

This letter is in response to your request regarding environmentally contaminated sites in the vicinity of 2085 and 2185 Capp Road in St. Paul, Minnesota. We understand that Barr Engineering Company is requesting information regarding the above-referenced property.

Regarding your request, the Minnesota Pollution Control Agency (MPCA) staff has conducted a limited file evaluation within a one-mile radius of the referenced property. The file evaluation included the review of the following:

- (1) EPA - National Priorities List (NPL);
- (2) EPA - Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS);
- (3) MPCA - Permanent List of Priorities (PLP);

List (1) and (3) are the respective federal and state Superfund lists. Sites on these lists are added and deleted by a specific administrative process. Sites on these lists have confirmed contamination and are under various stages of investigation and remediation. List (2) is a national inventory of suspected or confirmed hazardous waste sites. Sites on this list that warrant further investigation or remediation are candidates for further action under the state and/or federal Superfund programs.

- (4) MPCA - Hazardous Waste Generator/Investigation and Cleanup List;
- (5) MPCA - List of Permitted Solid Waste Facilities;
- (6) MPCA - RCRA Treatment, Storage, and Disposal Facilities;
- (7) MPCA - 1980 Metropolitan Area Waste Disposal Site Inventory;
- (8) MPCA - 1980 Statewide Open Dump Inventory;
- (9) MPCA - Voluntary Investigation and Cleanup (VIC) Unit List;
- (10) MPCA - Sites Delisted from Permanent List of Priorities;
- (11) EPA - No Further Remedial Action Planned (NFRAP) Sites, removed from CERCLIS by EPA;
- (12) MPCA - Closed Landfill Sites Undergoing Cleanup; and
- (13) MPCA - Other;

520 Lafayette Rd. N.; St. Paul, MN 55155-4194; (612) 296-6300 (Voice); (612) 282-5332 (TTY)

Regional Offices: Duluth • Brainerd • Detroit Lakes • Marshall • Rochester

Equal Opportunity Employer • Printed on recycled paper containing at least 20% fibers from paper recycled by consumers.

- (14) MPCA A site where public funds must be expended for investigation or cleanup to stimulate redevelopment.

Databases (4) through (9) are used by the MPCA to track various categories of sites. Database (4) is a listing of Hazardous Waste Generators that have been involved in some stage of investigation and/or cleanup with the MPCA staff providing technical review of the investigation and any necessary remedial activities. Upon investigation, a number of these properties have been cleaned up or found to not require any cleanup work. Database (5) and (6) identify facilities that handle solid or hazardous wastes and may not have experienced any releases. For databases (7) and (8), releases of contaminants at particular sites may not be yet confirmed or file information is limited. Database (9) is a registry of properties at which a voluntary investigation has been or is being conducted, with MPCA staff providing technical review of the investigation and any necessary remedial activities. A number of these properties have been investigated and cleaned up or found to not require any cleanup work. Database (10) identifies sites that have been delisted from the Permanent List of Priorities. Database (11) identifies sites that have been removed from CERCLIS by EPA. Database (12) identifies closed landfill sites that are undergoing landfill cleanup. Lastly, database (13) identifies sites that are in some stage of investigation. These sites do not meet the parameters of the previous categories.

We have no listings at the exact address given for the property. However, our file evaluation has revealed that the following sites are within a one-mile radius of the referenced property and are located on the attached map by the Identification Number in brackets:

- [377] McKay Manufacturing, 473 North Cleveland, St. Paul (2);
- [21] Archer Daniels Midland (also known as Northern Star-ADM, ADM/Highway 280), 419 29th Avenue Southeast, Minneapolis (3,9,11);
- [86] Schnitzer Iron and Metal Company, 2703 Territorial Road, St. Paul (3,9,11);
- [935] State Fair Demolition Site, north of Pierce Butler Route and Fairview Avenue, one-fourth mile east to west in size, near Energy Park Drive, St. Paul (7);
- [937] National Mower Company, 700 Raymond Avenue, St. Paul (7);
- [938] ADM Linseed Oil Epoxides Spill, west of Highway 280, north of Pearl Street, St. Paul (7);
- [1129] Shafer Construction Demolition Site, northeast of the Pierce Butler Route and Prior Avenue intersection, St. Paul (7);
- [3142] Great Northern Railway Site, vicinity of the Pierce Butler Route and Prior Street intersection, near the railroad tracks, St. Paul (7);
- [3145] Como Avenue and Packard Street Site, vicinity of the Como Avenue and Packard Street intersection, St. Paul (7);

- [2859] Westgate, northwest quadrant of the University Avenue and Highway 280 intersection, St. Paul (9);
- [2897] Energy Park West Site, Energy Park Drive, west of Snelling Avenue, from approximately the 1800 to 2000 block, St. Paul (9);
- [2886] CSM Corporation, northeast quadrant of the West State Drive and Territorial Road intersection, St. Paul (9);
- [3351] Great Northern Burlington - Berry Street, 803 Berry Street, St. Paul (9);
- [3437] Unisys Midway, 1902 Minnehaha Avenue, St. Paul (9);
- [3447] Harco Chemicals, Inc., 584 North Fairview Avenue, St. Paul (9);
- [3448] Zane May, Prior Avenue and University Avenue, St. Paul (9);
- [3402] Griggs Midway Building, 1821 University Avenue, St. Paul (9);
- [4110] McGill/Jensen, 655 Fairview Avenue North, St. Paul (9);
- [4315] General Foam, 1800 - 1810 Como Avenue, St. Paul (9);
- [4354] TCT - Driller's Building, 649 Pelham Boulevard, St. Paul (9);
- [2887] Northern Star Westgate, 3171 Fifth Street Southeast, St. Paul/Minneapolis (9);
- [4438] Midway Substation, 2250 Myrtle Street, St. Paul (9);
- [4509] Fisher Nut Facility, 2327 Wycliff Street, St. Paul (9);
- [2808] C. F. Trucking and Wintz Investment Company, 3245 Fourth Street Southeast, Minneapolis (11);
- [936] Standard Storage Battery Company, 2286 Capp Road, St. Paul (7,11); and
- [3413] Twin City Testing, Cromwell and Franklin Site, southeast intersection of Franklin Avenue and Cromwell Avenue, St. Paul (11).

Enclosed are:

- a list of Facilities with Air Emission Violations within the city of St. Paul; and
- a list of Air Permitted Facilities within the city of St. Paul.

Ms. Jessica Fitzpatrick

Page 4

The file evaluation included a review of the Hazardous Waste Information Management System database which contains information about RCRA generators. It is managed and updated continuously by MPCA staff. Our search revealed that no Hazardous Waste Generators of hazardous materials have been reported under the title and/or the exact address given for the property. Enclosed is:

- a list of Hazardous Waste Generators within the 55114 zip code area.

The file evaluation also included a review of the Under/Aboveground Storage Tank Information System data base, which contains information about under/aboveground storage, leaks, and spills of petroleum products and/or hazardous substances. It is managed and updated continuously by MPCA staff. No under/aboveground storage tank installations, leaking under/aboveground storage tanks, or spills of hazardous substances and/or petroleum products have been reported under the title and/or the exact address given for the property. Enclosed are:

- A list of registered underground storage tank installations and a list of leaking under/aboveground storage tanks reported within the 55114 zip code area; and
- a list of emergency responses that have been reported in St. Paul.

We suggest that you also contact the city of St. Paul or Ramsey County regarding the location of pipelines, under/aboveground storage tanks, and possible spills of petroleum products and/or hazardous substances which may have occurred in the area.

For concerns regarding Leaking Under/Aboveground Storage Tanks or Spills of petroleum products and/or hazardous substances reports, please refer to the enclosed **Leak/Spill and Under/Aboveground Storage Tank File Request Form**.

If you have questions regarding sites reported on the following lists, please contact the staff person listed below:

(2)	Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	Gary Krueger	612/296-6139
(3)	Permanent List of Priorities (PLP)	Gary Krueger	612/296-6139
(4)	Hazardous Waste Generator/Investigation and Cleanup Sites	Richard Baxter	612/297-8471
(7/8)	Metro and Statewide Open Dump Inventory	Chris Malec	612/297-5177
(9)	Voluntary Cleanup Program	Trudy Cramlet	612/296-7291
(10)	Sites Delisted from Permanent List of Priorities	Gary Krueger	612/296-6139
(11)	No Further Remedial Action Planned	Gary Krueger	612/296-6139

Air Permitted Facilities - for further information you must direct your concerns in writing to Todd Biewen in the Air Quality Division.

Large Quantity Generators - refer to contact name on the generator report.

Ms. Jessica Fitzpatrick

For information about agricultural chemical contamination, please contact Linda Haiby of the Minnesota Department of Agriculture (612) 297-5640.

This letter does not constitute an assurance on the part of the MPCA or the state of Minnesota that the property in question is free of any hazardous substances, pollutants, contaminants, or other conditions which may adversely affect the public health, welfare, or the environment.

Please be aware that the information in this letter is provided pursuant to the Minnesota Data Practices Act, Minn. Stat. ch. 13 and is not intended to relieve from liability any persons who may otherwise be liable under any provision of state or federal law or regulation. Nor is this letter intended to relieve any persons from responsibility they may have to investigate property prior to becoming involved in a transaction relating to that property. Lastly, you should be aware that the absence of information on a particular parcel of property does not necessarily mean that there are no problems connected with this property.

Minn. Stat. § 115B.17, subd. 14 (1992) requires that a person requesting this assistance pay the MPCA's cost of providing the assistance. The charge for this file evaluation is \$115.00 which includes two hours spent by staff at a rate of \$57.50 per hour. A bill for this and any other assistance provided this month will be mailed to you at the end of the month.

If you have any questions regarding this letter or if you would like to review our files, please call me at 612/297-1796.

Sincerely,

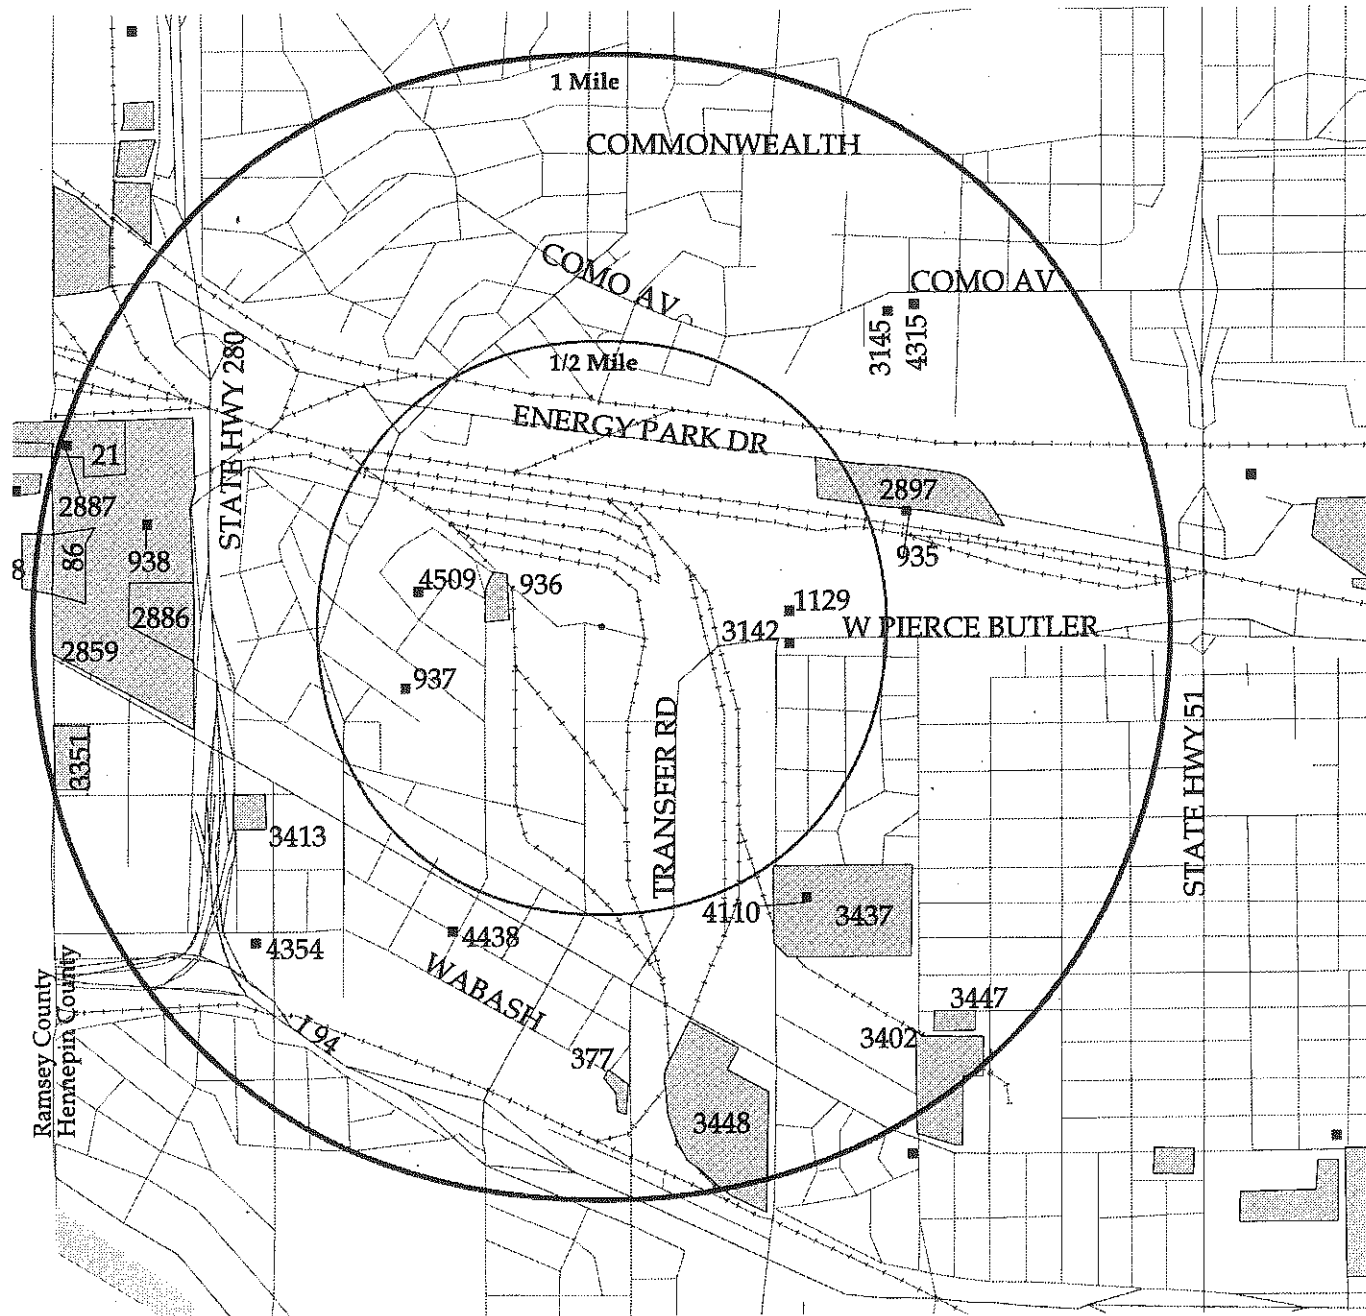

Carole J. Nelson

Minnesota Pollution Control Agency

Minnesota Pollution Control Agency
Permanent List of Priorities
June 1996

Site Name: Schnitzer Iron & Metal Co.

Location: St. Paul, Ramsey County

Priority: Minnesota List of Priorities Classification

C: Response Actions Design and Implementation

D: Remedial Investigation, Feasibility Study

National Priority List: No Score: 10

Site Description:

Scrap metal operations involved the handling of transformers, engine blocks and batteries which have also required the use of hydraulic oils, fuel oil, gasoline and cleaning solvents in the operation of on-site equipment. Chlorinated solvents, hydrocarbons, polychlorinated biphenyls and lead have been detected in soil borings taken at the site. Heavy metals, volatile organics and hydrocarbons are present in ground water samples taken from on-site monitoring wells.

<u>Assigned Staff:</u>	<u>MPCA</u>
Project Manager	Dale Trippler
Technical Analyst	Mike Trojan
On-Site Inspector	
Attorney General	Jocelyn Olson
Information Officer	Dave Erickson

Actions Taken To Date:

- Voluntary Site Investigation by responsible party, initiated March 1985, is presently on-going.
- Consent Order negotiated, signed by MPCA Board at July 28, 1987, meeting.
- Remedial Investigation Phase I completed.
- Remedial Investigation approved May 17, 1989.
- Feasibility Study submitted March 9, 1990.
- Sampling obtained from aboveground storage tanks.
- Obtained bench-scale study of heavy metal removal from soils of this site in 1992.
- Investigate heavy metal contamination disposal options in pilot scale and full scale during 1993 for feasibility determination.
- Disposal of above-ground storage tanks and contents was completed in August 1994.
- Requests for Information (RFI) were sent to over 100 possible Responsible Parties (RPs) in September 1994.
- A new fence was installed around the site in November 1994.
- MPCA tasks WCEC on March 3, 1995 to develop cost estimates for remediation of the Site.
- WCEC submits their final report and is approved on April 11, 1995.
- South Parcel Report submitted on March 28, 1995 requesting delisting of the south parcel.

Schnitzer Iron & Metal Co.

Actions Taken To Date (Continued):

- MPCA approves returning the south parcel to other beneficial uses based on data supplied in the South Parcel Report.
- Work Plan for the North Parcel Investigation submitted on April 25, 1995 and approved on May 11, 1995.
- MPCA issues a risk analysis document on November 3, 1995 showing the ground water pathway will not be a factor in determining the final cleanup goals and site closure.
- Commissioner Notice Letters sent between July 1995 and February 1996 to over 60 Responsible Parties.

Actions Needed:

- Design and implement Response Actions for the North parcel of the site.
- Consider Cleanup goal and remediation technologies recommended by RP Group.
- Hold De minimis party meeting to explain cleanup goal and remediation and to offer Consent Order with an allocation payment and insurance payment as their part of the cleanup.
- Oversee final remediation of the site and delist.

Minnesota Pollution Control Agency
Permanent List of Priorities
June 1996

Site Name: Archer Daniels Midland/Highway 280 Site

Location: Minneapolis/St. Paul, Hennepin/Ramsey Counties

Priority: Minnesota List of Priorities Classification

C: Response Action Design and Implementation

D: Remedial Investigation and Feasibility Study

National Priority List: No Score: 14.51

Site Description: The Archer Daniels Midland/Highway 280 Site (Site) is located in an industrial corridor along the border of Minneapolis and St. Paul. During construction activities at the Site in 1991, buried drums were discovered. An investigation revealed buried drums, estimated at between 300 and 500, which contain various wastes. The drums were found in waste/fill materials that were disposed at the Site. These waste/fill materials are estimated to be in excess of 200,000 cubic yards and contain incinerator ash, fly ash, construction debris, and "foots," a reported by-product of linseed oil production.

Assigned Staff:

Project Manager

Technical Analyst

On-Site Inspector

Attorney General

Public Information Officer

MPCA

Frank Wallner

Eric Dott

Steven Schoff

Alan Williams

Actions Taken To Date:

- Preliminary remedial investigation done at Site by Barr Engineering during July, August, and September 1991.
- Site Security Fencing.
- Removal Investigation carried out by ENSR in August and September 1992.
- Removal Action Work Plan submitted to MPCA November 1992.
- Limited Remedial Investigation by CRA submitted to MPCA February 1994.
- Interim Response Action Plan by CRA submitted to MPCA in February 1994.
- Focused Feasibility Study by CRA submitted to MPCA in February 1994.
- Land Treatment work plan by CRA submitted to MPCA in August 1994.
- Scope of Work Bio-venting Pilot Study by CRA submitted to MPCA in August 1994.
- Interim Response Action (removal of buried drums) completed in December 1994.
- Final Remedial Investigation Report submitted in January, 1996

Actions Needed:

- Review Final RI
- Implement final response actions

Minnesota Pollution Control Agency

PRELIMINARY ASSESSMENT EXECUTIVE SUMMARY

Twin City Testing, Cromwell and Franklin Site MND9857669880

June 30, 1993

The Twin City Testing, Cromwell and Franklin Site (Site) is located on the northern one-half of the 700 block of Cromwell Avenue, St. Paul, Ramsey County, Minnesota. The Twin City Testing Corporation, 737 Pelham Boulevard, St. Paul, Minnesota, currently owns the Site.

The Site is located in a mature industrial area of St. Paul. The Site is bounded on the north by Franklin Avenue, on the west by Cromwell Avenue, on the east by Pelham Boulevard, and on the south by the remainder of the Twin City Testing property. It is located on relatively open level terrain that gently slopes to the southwest towards Cromwell Avenue. Presently, the Site is occupied in part by the northern portion of one of the new Twin City Testing Corporation office and/or laboratory buildings. The rest of the Site consists of a grass covered lawn.

Prior to the construction of the on-site building, the Site was occupied by numerous buildings that housed a variety of businesses. The nature of these businesses is not entirely known at this time. These buildings and their respective properties were purchased by the St. Paul Port Authority and demolished. The resulting vacant properties were sold to the Twin City Testing Corporation for the purpose of expanding their existing facilities. According to Sanborn Fire Insurance maps located at the Minnesota Historical Society, properties located at the Site in 1927 include, but are not limited to, a machine shop, a filling station, a cut glass factory, and other unidentified buildings. In addition, prior to demolition, a number of businesses existed in the buildings then present, but it is unknown at this time what types of operations may have occurred and to what extent those businesses may have contributed to the on-site contamination.

MPCA staff first became aware of the Site in the spring of 1989 when on April 6, 1989, the Twin City Testing Corporation requested assistance from the MPCA Property Transfer Program (PTP) to review a workplan put together by the Twin City Testing Corporation for the Port Authority of the city of St. Paul. The Port Authority was in the process of purchasing land (the 700 block of Cromwell Avenue) to assist Twin City Testing in the expansion of their facilities. The workplan was on the removal of lead and PAH contaminated soils stockpiled on the southern one-half of the 700 block of Cromwell Avenue. PTP staff visited the Site on April 13, 1989. The soils had been hauled and dumped by the previous owner from a nearby off-site property as a result of a recent renovation. The workplan called for the removal of the stockpiled soils to another location where they would be spread out and covered with asphalt. At this time, PTP staff noted the presence of three monitoring wells located on the northern one-half of the 700 block of Cromwell Avenue. PTP staff requested information pertaining to the monitoring wells from Twin City Testing staff on several occasions.

According to a report submitted by the Twin City Testing Corporation, a map contained within the report indicated that soil borings were conducted at the Site. Chemical analyses of some of the soil samples collected from the borings revealed the presence of a number of semivolatile organic compounds at elevated levels. The source of the contamination is unknown. Three monitoring wells were installed at the Site presumably by the Twin City Testing Corporation sometime in the spring of 1989 or winter of 1988.

At the time of this report, chemical analysis of ground water samples taken from those wells had not been made available to MPCA staff for inclusion in the Preliminary Assessment. However, an anonymous complaint submitted to PTP staff alleges that if the well had been sampled, the results would have indicated gross ground water contamination, possibly by trichloroethene.

Minnesota Pollution Control Agency

EXECUTIVE SUMMARY PRELIMINARY ASSESSMENT

McKay Mfg/Anderson Estate Bldg. (Former)

MND981538655

June 26, 1987

Situation

On February 16, 1985, the St. Paul Police investigated an abandoned warehouse at 473-475 North Cleveland Avenue (Site) because of an explosion that had occurred which injured two people. When they inspected the Site, they found numerous bottles, cans and containers of chemicals including 1,1,1 trichloroethane, nitric acid and barrels marked Caustic Soda. They also found dynamite caps and a large amount of chemicals and old equipment.

The Minnesota Pollution Control Agency (MPCA) Hazardous Waste Enforcement staff visited the Site on March 13, 1985, and found approximately 30 full or partially full 55-gallon drums of solvents, acids and bases, and used oil. Several 5 to 30-gallon containers, seven full 15-gallon carboys, and many boxes of miscellaneous containers, including spray paint and paint thinner cans were also noticed. In addition, most of the three floors in the building were littered with solid waste.

The owners of the building, McKay Manufacturing Company, had leased floors of the Anderson Estate Bldg. (Site) to Gary Walker, who operated a small machine shop, and to C & H Chemical Company. The bank foreclosed on Mr. Walker and when McKay Mfg. received the property back, the warehouse was full of chemicals and large amounts of solid waste.

The McKay Mfg. Co. worked with the MPCA Hazardous Waste Enforcement staff to clean up the Site. All chemicals, used oil, barrels, miscellaneous containers, etc. were removed from the Site and copies of manifests and bills of lading were sent to the MPCA.

The Site was inspected again by MPCA staff on September 2, 1986, who confirmed that the Site had been cleaned up.

Minnesota Pollution Control Agency

EXECUTIVE SUMMARY

Archer Daniels Midland

MND056086309

December 12, 1984

Situation

The Archer Daniels Midland (ADM) Site (Site) is located in Minneapolis, Minnesota. In 1978, the Minnesota Pollution Control Agency (MPCA) responded to information that a brown liquid was oozing from the ground. Investigations by ADM and the MPCA indicated that the area was a pile of "foots". "Foods" is the waste product from pressing flax seed for the manufacture of linseed oil; linseed oil is no longer produced at the Site.

A 1979 U.S. Environmental Protection Agency (EPA) Preliminary Assessment identified that there was a threat of ground water contamination and of soil contamination. Samples of the "foots" pile and leachate were analyzed for pesticides, hydrocarbons, oil, and grease and phenols. There were no significant concentrations of hydrocarbons and phenol concentrations were less than 0.01 mg/l. Analysis of samples from a nearby water well showed phenolic compounds at less than 2.0 ug/l.

In 1981, the MPCA received a complaint that resins and solvents had been dumped on ADM property. The dumping occurred between 1958 and 1960. The disposal area purportedly was underneath the "foots" pile. Another complaint was received in 1983 alleging that drums of oil containing PCBs were buried under the "foots" pile; burial supposedly occurred between 1978 and 1980. During a site inspection, parts of drums could be seen in the "foots" pile.

Inspection Priority Recommendation

A low potential hazard is recorded in Part 1, V. of the Preliminary Assessment because no sample analyses have been conducted for PCBs.

A low (pending) inspection priority is recorded in Part 1, V.01 because the state is taking action. This priority recommendation is subject to change depending upon the results of the state's activities.

Minnesota Pollution Control Agency

PRELIMINARY ASSESSMENT EXECUTIVE SUMMARY

Schnitzer Iron & Metal Company MND008904963

Situation

Schnitzer Iron & Metal Company (Site) ran a salvage operation from the 1930s to around 1980. The Site accepted transformers, engines, and batteries, as well as disposed of solvents and oils. Oil from these components were allowed to drain onto the ground. Fuel tanks, both above and below ground, were used to store oils and gasoline at the Site. In March 1985, EWA, Inc. conducted an investigation and found PCBs and lead at levels greater than MPCA limits within the surficial soils. Also, volatile organic compounds were found in soil borings down to a depth of 50 feet (the water table exists at a depth of 70 feet).

Inspection Priority Recommendation

The MPCA staff has conducted a Preliminary Assessment for the Site. As a result, the MPCA staff believes that the Site represents a low potential hazard to the environment because disposal problems have been documented, but ground water contamination has not been verified and the possibility of affecting drinking water supply wells is highly unlikely. In conclusion, the MPCA staff hereby recommends that the Site be assigned a low priority for inspection because the Site plans to expand its investigation which will be reviewed by MPCA staff.

Minnesota Pollution Control Agency

PRELIMINARY ASSESSMENT EXECUTIVE SUMMARY

**C.F. Trucking and Wintz Investments Company
September 8, 1989**

Situation

C.F. Trucking operated a trucking office/warehouse and Wintz Investments Company operates a truck repair garage in southeast Minneapolis, Minnesota. Both buildings occupy a five-acre site, owned by Space Center, Inc. In June 1987, Braun Environmental Laboratories, Inc. conducted an environmental evaluation of the site and detected elevated levels of metals in the soil and volatile organic compounds (VOC) in the ground water. Past disposal and waste storage practices are not known. It is possible that waste oils and solvents were dumped to a floor drain in the Wintz Garage and emptied to a central sump which could have allowed contamination to reach surrounding soils. The Schnitzer Site (MND008904963), an inactive iron and metal salvage company, is adjacent to the C.F. Trucking and Wintz Investments Company site, and VOCs were detected in the soil there also. The C.F. Trucking and Wintz Investments Company site appears to be downgradient from the Schnitzer site; therefore, contamination from the Schnitzer site may be impacting ground water at the C.F. Trucking and Wintz Investment site.

Minnesota Pollution Control Agency

EXECUTIVE SUMMARY

Standard Storage Battery Company MND006162580

July 1, 1985

Situation

Standard Storage Battery Company (Site) manufactures batteries. Part of the past process included casting, degreasing, and installing metal posts onto the battery casings. Trichloroethylene was used as the degreasing agent.

A 1978 survey by Minnesota Pollution Control Agency (MPCA) staff of industrial waste disposal practices indicated that waste trichloroethylene was poured onto the Site's parking lot. Other hazardous wastes generated included dust and sludge containing lead oxides. These wastes were sold to a local smelter company. An epoxy trichloroethylene sludge was also generated and presumed to have been disposed of at a local landfill. The Site still manufactures batteries, but the process has changed since 1978. Very little trichloroethylene is used and any waste is allowed to evaporate. The parking lot(s) are either paved or covered with gravel.

Inspection Priority Recommendation

The Site was perceived to have a low hazard potential because the majority, if not all, of the area is serviced by the municipal water system. Additional information about the nature (e.g., pure or diluted) and amounts of trichloroethylene poured on the parking lot is advised. A low priority for inspection is recommended.

Product Codes

AB	acid/base chemicals
ACO	crop oil
AF	fertilizer
AG	ag-related products
AM	manure
AO	agricultural other or unspecified
AP	pesticide
AR	rinsate
CA	chemical acidic
CAF	antifreeze
CC	chemical base
CGT	compressed gas tank
CMOT	mineral oil (electric equipment)
CO	chemical other or unspecified
CS	chemical solvent
EC	electrical contaminants
F	food
FO	food products
GAS	gasoline type unknown
MC	miscellaneous chemicals
MM	miscellaneous materials
MO	motor oil
MS	mineral spirits
OO	other substance
OT	other
PA	asphalt
PAV	aviation gas
PC	crude oil
PCB	askarel
PD	diesel
PG	gasoline regular
PGG	gasohol
PGN	gasoline grade not known
PGU	gasoline unleaded
PH	fuel oil grade unknown
PH12	fuel oil 1 & 2
PH46	fuel oil 4 - 6
PHF	hydraulic fluid
PK	kerosene
PL	lube oil
PP	petroleum product other or unspecified
PW	waste oil
TF	transmission fluid
WW	waste water

Cause Codes

AC	aircraft
AR	air complaint, release, or odor complaint
AS	aboveground tank system
DA	improper disposal or abandoned waste
EL	transformer, capacitor or other electrical
FI	fire
MF	mechanical failure
NP	nonpoint runoff

OT	other
PL	pipe line or pipe line system
RR	railroad
SP	spill
TV	truck or vehicle
UN	unknown
US	underground tank system
WA	water complaint
WC	watercraft
WW	sewer or wastewater plant upset or bypass

Tanks and Emergency Response Section Minnesota Pollution Control Agency

Tanks and Emergency Response Section File Request Program

Fact Sheet # 3.35

September 1996

The Minnesota Pollution Control Agency (MPCA) Tanks and Emergency Response Section (TERS) File Request Program has been developed to provide information to the public from the TERS files and databases. Parties requesting information are asked to fill out a form titled "Leak/Spill and Underground Storage Tank File Request Form." All requests are completed in the order they are received. The amount of time it takes to complete a request varies, however, requests can usually be completed within one to two weeks.

WHAT INFORMATION IS PROVIDED THROUGH THE TANKS AND EMERGENCY RESPONSE SECTION FILE REQUEST PROGRAM?

Leaking Storage Tank Information: Files regarding reported petroleum-related releases from underground and aboveground storage tanks are available for review and copying. Lists of leaking storage tank sites are available by state, county, city and zip code. The lists include the address; site identification number; date the leak was reported; date the file was closed, if applicable; and the MPCA TERS staff person overseeing the project.

Spills Information: All spills reported to the MPCA are recorded and distributed to the appropriate regulatory program. Information from the spill files is available for review or copying. Lists of spills reported to the MPCA are available by county and city. Agricultural-related spills are regulated by the Department of Agriculture.

Underground Storage Tank Information: Lists are available for all registered underground storage tanks by county, city and zip code. Information available includes the number of tanks, facility type, tank number, tank capacity, tank status and the product stored in each tank.

Aboveground Storage Tank Information: Lists are available for all registered aboveground storage tanks. For more information contact Chris Bashor at 612/297-8618.

HOW MUCH DOES THIS SERVICE COST?

Currently, the cost associated with performing this service is \$90 per hour with a minimum charge of \$22.50. Also, there is a charge of 20 cents for each page copied. In accordance with Minnesota law, parties requesting assistance through this program must reimburse the MPCA for the cost of providing the assistance. All reimbursements collected will be deposited in the Minnesota Environmental Fund

WHAT OTHER SERVICES ARE AVAILABLE?

MPCA Ground Water and Solid Waste Division/Program Development Section Property Transfer File Evaluation Program

The MPCA Ground Water and Solid Waste Division/Program Development Section (GWSW/PD) Property Transfer File Evaluation Program reviews selected agency files for evidence of contamination within a one mile radius of a particular address.

Files reviewed as part of the evaluation include the National Priorities List; the Permanent List of Priorities; Comprehensive Response, Compensation and Liability Information System (CERCLIS); Regulatory Compliance, Hazardous Waste Enforcement Log; List of Permitted Solid Waste Facilities; Hazardous Waste Permit Unit Project Identification List; 1980 Metropolitan Area Waste Disposal Site Inventory; 1980 Statewide Open Dump Inventory; Air Quality Permits; RCRA Large Quantity Generators; Property Transfer Technical Review List; List of Facilities with Air Emission Violations; Registered Underground Storage Tanks; Leaking Petroleum Storage Tanks and Reported Spills.

Even though the MPCA GWSW/PD File Evaluation Program identifies sites listed in the MPCA TERS database, the specific information from the files will have to be requested through the MPCA TERS File Request Program. A fee of \$45 per hour with a two hour minimum is charged for the service. For more information about the MPCA GWSW/PD File Evaluation Program, please contact Carole Nelson at 612/297-1796.

Department of Administration -List Services

The Department of Administration provides a state-wide list of underground storage tanks on computer tape for a fee. For more information contact Debby Svoboda at 612/297-2552.

WHO TO CALL WITH MORE QUESTIONS:

If you have questions about the MPCA TERS File Request Program, please call 612/297-8499. If calling long distance, MPCA staff can be reached at 1-800-657-3864.

This fact sheet can be made available in other formats including Braille, large print and audio tape.

TTY users call: (612) 282-5332 or 1-800-657-3864(voice/TTY).

Minnesota Pollution Control Agency
Tanks and Emergency Response Section

LEAK/SPILL AND UNDERGROUND STORAGE TANK FILE REQUEST FORM

In the space provided below, please fill in the name, address and telephone number of the party or firm requesting the information listed below. Thank you for writing clearly.

NAME: _____ COMPANY NAME: _____

ADDRESS: _____

CITY: _____ STATE: _____ ZIP CODE: _____

TELEPHONE: _____ PROJECT NUMBER IF APPLICABLE: _____

SIGNATURE: _____ DATE: _____

Your request will be filled as time allows. Pursuant to Minn. Stat. § 13.03, subd. 3, if you request copies from the file(s), the Minnesota Pollution Control Agency (MPCA) will charge you for the cost of searching for and retrieving the file(s) or electronically maintained information, and for the cost of the copies. There is no charge if you are just inspecting the file(s). The costs associated with retrieving the file(s) or electronic information are \$90.00 per hour. Charges will be assessed in quarter hour increments (\$22.50). The minimum charge for providing these services is \$22.50 plus a per page cost of 20¢. An additional charge of \$3.40 will be assessed for each file requested that has been archived.

An invoice for requested copies, the time spent retrieving the files, and providing the information requested will be sent to the above address.

PLEASE NOTE, REQUESTS ALONG WITH COPIES MAY NOT BE IMMEDIATELY AVAILABLE, IT MAY TAKE 10 TO 14 WORKING DAYS FOR YOU TO RECEIVE THEM. ALSO, IF THE REQUEST INVOLVES COPYING MORE THAN 100 PAGES YOU WILL BE ASKED TO PROVIDE YOUR OWN COPY SERVICE.

LEAK AND SPILL INFORMATION

Please list the information for the files you are requesting below. PLEASE BE AS COMPLETE AS POSSIBLE. There is a MAXIMUM of four (4) files per request.

FACILITY/SITE NAME AND ADDRESS	LEAK NUMBER	SPILL NUMBER
1. _____		
2. _____		
3. _____		
4. _____		

Upon request, this document can be made available in other formats, including Braille, large print and audio tape. TTY users call 612/282-5332 or Greater Minnesota TTY 1-800-657-3864 (voice/TTY).

Printed on recycled paper containing at least 10% fibers made from paper recycled by consumers.

EDR Sanborn, Inc.

City Directory Abstract

EDR Sanborn, Inc.'s (EDR Sanborn) City Directory Abstract is a screening tool designed to assist professionals in evaluating potential liability on a target property resulting from past activities on the property or adjoining properties. ASTM E 1527-97, Section 7.3 on Historical Use Information, identifies the prior use requirements for a Phase I environmental site assessment. The ASTM standard requires a review of *reasonably ascertainable standard historical sources*. *Reasonably ascertainable is defined as information that is publicly available, obtainable from a source with reasonable time and cost constraints, and practically reviewable.*

To meet the prior use requirements of ASTM E 1527-97, Section 7.3.2, the following *standard historical sources* may be used: aerial photographs, city directories, fire insurance maps, property tax files, land title records (although these cannot be the sole historical source consulted), topographic maps, building department records, or zoning/land use records. ASTM E 1527-97 requires *"All obvious uses of the property shall be identified from the present, back to the property's obvious first developed use, or back to 1940, whichever is earlier. This task requires reviewing only as many of the standard historical sources as are necessary, and that are reasonably ascertainable and likely to be useful."* (ASTM E 1527-97, Section 7.3.2, page 11.)

EDR Sanborn's City Directory Abstract includes a search and review of available city directory data. City directories have been published for cities and towns across the U.S. since the 1700s. Originally a list of residents, the city directory developed into a sophisticated tool for locating individuals and businesses in a particular urban or suburban area. Twentieth century directories are generally divided into three sections: a business index, a list of resident names and addresses, and a street index. With each address, the directory lists the name of the resident or, if a business operated from this address, the name and type of business (if unclear from the name). While city directory coverage is comprehensive for major cities, it may be spotty for rural areas and small towns. ASTM E 1527-97 specifies that a *"Review of city directories (standard historical sources) at less than approximately five years intervals is not required by this practice"* (ASTM E 1527-97, Section 7.3.2.1, page 11.)

SUMMARY

- ***City Directories:***

EDR Sanborn reviewed available national city and cross reference directory collections at approximately five year intervals for the years spanning 1856 through 1997. (These years are not necessarily inclusive.) A summary of the information obtained is provided in the text of this report.

The following sources may be contacted for additional information. Sources are identified through *Carroll's Municipal/County Directory* published by Carroll Publishing.

Glossary of Terms

A.A.A.

Aerial photograph flyer: Agriculture Adjustment Administration (Federal).

A.S.C.S

Aerial photograph flyer: Agricultural Stabilization and Conservation Service (Federal)

Address Change

Indicates that a change of address has occurred; indicates new address. A change of address may occur when a city, street, or the address ranges of a street are restructured.

Address in Research Source

Indicates that a property is listed at a different address than the one provided by the user. Generally occurs when a property is located on a corner or, when the physical address of a property is different than its mailing address.

Address Not Listed in Research Source

Occurs when a specific site address is not listed in city directories and/or fire insurance maps.

Adjoining

Any property that is contiguous, or a property that would be contiguous if not for a public thoroughfare, to the target property. *To differentiate from each adjoining property, stand at the target property's "front door" facing the street.*

Adjoining Back

Property directly to the rear of the target property.

Adjoining Front

Property directly in front of the target property.

Adjoining Left

Property directly to the left of the target property.

Adjoining Right

Property directly to the right of the target property.

Adjoining Surrounding Area

Property that may adjoin the target property but due to lack of specific map information cannot be located precisely. This situation typically occurs when city directory information, but not fire insurance map information, is available.

C.A.S

Aerial photograph flyer: Chicago Aerial Survey (private).

C.S.S.

Aerial photograph flyer: Commodity Stabilization Service (Federal).

Cartwright

Aerial photograph flyer: Cartwright (private)

CD

City Directory

Commercial

Any property including, but not limited to, property used for industrial, retail, office, agricultural, other commercial, medical, or educational purposes; property used for residential purposes that has more than four residential dwelling units.

Commercial or Industrial

Property that has either a commercial *or* an industrial use. Examples include retail stores, manufacturing facilities, factories, and apartment buildings.

D.N.R.

Aerial photograph flyer: Department of National Resources (state).

D.O.T.

Aerial photograph flyer: Department of Transportation (state).

Fairchild

Aerial photograph flyer: Fairchild (private).

FIM

Fire Insurance Map

Flood Insurance Rate Maps

Flood Insurance Rate Maps are produced by the Federal Emergency Management Agency (FEMA). These maps indicate special flood hazard areas, base flood elevations and flood insurance risk zones.

Flood Prone Area Maps

Flood Prone Area maps are produced by the United States Geological Survey (USGS). Areas identified as flood prone have been determined by available information gathered from past floods.

F.S.

Aerial photograph flyer: Forest Service (Federal).

Geonex

Aerial photograph flyer: Geonex (private).

M.C.

Aerial photograph flyer: Metropolitan Council of the Twin Cities Area (state).

Map Required Not Available in Local Collection

Property is located on a fire insurance map sheet not available in local and/or microfilm collection.

Mark Hurd

Aerial photograph flyer: Mark Hurd (private)

Multiple Locations

Indicates that there are two or more sites adjoining the target property's border.

N.A.P.P.

Aerial photograph flyer: National Aerial Photography Program (Federal).

National Wetland Inventory Maps

National Wetland Inventory Maps are produced by the U.S. Fish and Wildlife Service, a division of the U.S. Department of the Interior. Wetland and deepwater habitat information is identified on a 7.5 minute U.S.G.S. topographic map. The classification system used categorizes these habitats into five systems: marine, estuarine, riverine, lacustrine and palustrine.

No Return

Indicates that site owner was unavailable at time of surveyor's contact. *Applies only to city directories.*

No Structure Identified on Parcel

Used when site boundaries and/or site address is indicated on a fire insurance map; no structure details exist.

Other

Occurs when the site's classification is different than EDR's standard categories. Examples may include undeveloped land and buildings with no specified function.

P.M.A.

Aerial photograph flyer: Production and Marketing Administration (Federal).

Pacific Aerial

Aerial photograph flyer: Pacific Aerial (private)

Portion

Refers to the fire insurance map information identified on the four quadrants of a target or adjoining property. The portions are referred to as *Frontright*, *Frontleft*, *Backright*, and *Backleft* and are determined as if one were standing at the front door, facing the street.

Property Not Defined

Used when property is not clearly demarcated on a fire insurance map.

Residential

Any property having fewer than five dwelling units used exclusively for residential purposes.

Residential with Commercial Uses (a.k.a. Multiple Purpose Address)

A business (firm) and residence at the same address. Examples include a doctor, attorney, etc. working out of his/her home.

Sidwell

Aerial photograph flyer: Sidwell (private).

Site Not Mapped

Occurs when an adjoining property has not been mapped by fire insurance map surveyors.

Teledyne

Aerial photograph flyer: Teledyne (private)

Topographic Maps

Topographic maps are produced by the United States Geological Survey (USGS). These maps are color coded line and symbol representations of natural and selected artificial features plotted to scale.

Turnbow

Aerial photograph flyer: Michael Turnbow (private)

U.S.D.A.

Aerial photograph flyer: United States Department of Agriculture (Federal).

U.S.D.I.

Aerial photograph flyer: United States Department of the Interior (Federal).

U.S.G.S.

Aerial photograph flyer: United States Geological Survey (Federal).

Vacant

May refer to an unoccupied structure or land. *Used only when fire insurance map or city directory specifies 'vacant.'*

W.P.A.

Aerial photograph flyer: Works Progress Administration (Federal).

WALLACE

Aerial photograph flyer: Wallace (private).

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The report meets the government records search requirements of ASTM Standard Practice for Environmental Site Assessments, E 1527-97. Search distances are per ASTM standard or custom distances requested by the user.

The address of the subject property for which the search was intended is:

2185 + 2085 CAPP RD
ST PAUL, MN 55114

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the subject property or within the ASTM E 1527-97 search radius around the subject property for the following Databases:

NPL:	National Priority List
Delisted NPL:	NPL Deletions
SHWS/PLP:	Superfund Permanent List of Priorities
CERCLIS:	Comprehensive Environmental Response, Compensation, and Liability Information System
RAATS:	RCRA Administrative Action Tracking System
HMIRS:	Hazardous Materials Information Reporting System
PADS:	PCB Activity Database System
ERNS:	Emergency Response Notification System
NPL Lien:	Federal Superfund Liens
TSCA:	Toxic Substances Control Act
MLTS:	Material Licensing Tracking System
MN PEST:	Pesticide Dealers
MN FERT:	Fertilizer Dealers
MN AGSPILLS:	Department of Agriculture Spills
MN LCP:	Closed Landfills Priority List
MN HWS Permit:	Active TSD Facilities
MN Del. SHWS:	Sites Delisted From PLP
ROD:	Records Of Decision
CONSENT:	Superfund (CERCLA) Consent Decrees
Coal Gas:	Former Manufactured gas (Coal Gas) Sites.

Unmapped (orphan) sites are not considered in the foregoing analysis.

Search Results:

Search results for the subject property and the search radius, are listed below:

Subject Property:

The subject property was not listed in any of the databases searched by EDR.

EXECUTIVE SUMMARY

Surrounding Properties:

Elevations have been determined from the USGS 1 degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. EDR's definition of a site with an elevation equal to the subject property includes a tolerance of -10 feet. Sites with an elevation equal to or higher than the subject property have been differentiated below from sites with an elevation lower than the subject property (by more than 10 feet). Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

RCRIS: The Resource Conservation and Recovery Act database includes selected information on sites that generate, store, treat, or dispose of hazardous waste as defined by the Act. The source of this database is the U.S. EPA.

A review of the RCRIS-TSD list, as provided by EDR, and dated 04/01/1997 has revealed that there are 3 RCRIS-TSD sites within approximately 1.25 Miles of the subject property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
<i>WORUM CHEMICAL CO.</i>	<i>2130 ENERGY PARK DR</i>	<i>1/4 - 1/2N</i>	<i>L54</i>	<i>59</i>
<i>COMO LUBE AND SUPPLIES INC</i>	<i>2148 MYRTLE AVE</i>	<i>1/2 - 1 S</i>	<i>143</i>	<i>128</i>
<i>POLY-METAL PRODUCTS CO</i>	<i>2489 VALENTINE AVE</i>	<i>1 - 2 NNW</i>	<i>146</i>	<i>136</i>

CERCLIS-NFRAP: As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund Action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

A review of the CERC-NFRAP list, as provided by EDR, and dated 04/30/1997 has revealed that there are 2 CERC-NFRAP sites within approximately 0.25 Miles of the subject property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data comes from the Minnesota Pollution Control's Underground Storage Tank File.

A review of the UST list, as provided by EDR, and dated 05/13/1996 has revealed that there are 26 UST sites within approximately 0.5 Miles of the subject property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 09/30/1995 has revealed that there are 31 FINDS sites within approximately 0.25 Miles of the subject property.

GEOCHECK VERSION 2.1 SUMMARY

GEOLOGIC AGE IDENTIFICATION†

Geologic Code: O2
Era: Paleozoic
System: Ordovician
Series: Middle Ordovician (Mohawkian)

ROCK STRATIGRAPHIC UNIT†

Category: Stratified Sequence

GROUNDWATER FLOW INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, including well data collected on nearby properties, regional groundwater flow information (from deep aquifers), or surface topography.‡

General Topographic Gradient: General East
General Hydrogeologic Gradient: No hydrogeologic data available.
Site-Specific Hydrogeological Data*:
Search Radius: 2.0 miles
Status: Not found

USGS TOPOGRAPHIC MAP ASSOCIATED WITH THIS SITE

STATE DATABASE WELL INFORMATION

WATER WELL INFORMATION:

Well Within 1/4 - 1/2 Mile of Target Property (Northern Quadrant)

Principal Well Information:

Unique Well #:	223838	County:	RAMSEY
Township:	29	Section	28
Range:	23	Elevation (in Ft.):	888
Subsection:	BCBBCC	Locator:	MGS
Location Method	Info. from Owner	Depth Completed (in Ft.):	270
7.5 Minute Quadrangle:	103B	Date drilled:	00/00/1971
Depth Drilled (in Ft.):	270	Date of Last Update:	08/23/1991
Status:	Active	Not Reported	
Geographic Coordinates Method:		Owner's Name:	Not Reported
Well Name:	BERCHEMS READY MIX CONCR	Local Identifier Type:	Not Reported
Local Identifier:	Not Reported	62012	
Data Source/Driller's License #:		Depth Cased (in Ft.):	Not Reported
Casing Diam. (in inches):	6	Permit Type:	Not Reported
Permit #:	Not Reported	Wellhead Protection Area:	Not Reported
First Bedrock:	OSTP	Open Interval-Bottom Unit:	Not Reported
Open Interval-Top Unit:	Not Reported	Well Grouted ?:	Not Reported
DNR Application #:	Not Reported	Date Well Abandoned:	Not Reported
Well Sealed ?:	Not Reported		
Aquifer:	Not Reported		
Depth to Bedrock (in Ft.):	180		
Any other Unused, Abandoned Well on Property ?:		Not Reported	
Potential Pollution Source Type:		Not Reported	
Potential Pollution Source Distance (in Ft.):		Not Reported	
Potential Pollution Source Direction:		Not Reported	
Use:	Industrial		
Elevation Method:	7.5-minute Topographic Map (+ or - 5 Feet)		
Indicator that data for this well are contained in the DNT Observation Well Network Data base:		Not Reported	
Indicator that an entry for this well exists in the State Water Use Data System:		Not Reported	
Indicator that data exist for this well in the PCA Integrated Ground-Water Information System:		Not Reported	
Indicator of the availability of cuttings, core or downhole geophysical data for this well:		Not Reported	
Indicator of the existence of a digitized UTM location for this well:		Not Reported	

Geologic Information:

Geologic Interp. Method:	Not Reported	
Geologic Interpretation Source:		Not Reported
Geologist Responsible:	Not Reported	Date of Last Update: 08/23/1991

Driller's/Geologic Log Information:

Description of Geologic Materials:	LANDFILL
Depth to the Top of measured Interval (in Ft.):	0
Hardness of Geologic Materials:	Not Reported
Interpreted Primary Lithography:	SAND
Secondary Lithography:	SILT
Minor Lithography:	Not Reported
Color of Geo. Materials:	Not Reported
Stratigraphic Unit:	Holocene Deposits

GEOCHECK VERSION 2.1
STATE DATABASE WELL INFORMATION

Description of Geologic Materials:	GLACIAL DRIFT
Depth to the Top of measured Interval (in Ft.):	10
Hardness of Geologic Materials:	Not Reported
Interpreted Primary Lithography:	SAND
Secondary Lithography:	SILT
Minor Lithography:	GRAVEL
Color of Geo. Materials:	Not Reported
Stratigraphic Unit:	PLEISTOCENE UNDIFF.

Description of Geologic Materials:	SANDSTONE
Depth to the Top of measured Interval (in Ft.):	180
Hardness of Geologic Materials:	Not Reported
Interpreted Primary Lithography:	SANDSTONE
Secondary Lithography:	Not Reported
Minor Lithography:	Not Reported
Color of Geo. Materials:	ORANGE
Stratigraphic Unit:	ST.PETER

Description of Geologic Materials:	SHAKOPEE FORMATION
Depth to the Top of measured Interval (in Ft.):	200
Hardness of Geologic Materials:	Not Reported
Interpreted Primary Lithography:	DOLOMITE
Secondary Lithography:	Not Reported
Minor Lithography:	Not Reported
Color of Geo. Materials:	Not Reported
Stratigraphic Unit:	PRAIRIE DU CHIEN GROUP

Remarks:

M.G.S. NO. 662

Well currently has or has had major violation(s): No

EPA Waste Codes Addendum

Code	Description
D001	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
D002	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
D003	A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BE WASTE GUNPOWDER.
D006	CADMIUM
D007	CHROMIUM
D008	LEAD
D009	MERCURY
D011	SILVER
D018	BENZENE
D021	CHLOROBENZENE
D027	1,4-DICHLOROBENZENE
D035	METHYL ETHYL KETONE
D039	TETRACHLOROETHYLENE
D040	TRICHLOROETHYLENE
F001	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F002	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE

EPA Waste Codes Addendum

Code	Description
	CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F003	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F005	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F006	WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.
F007	SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS
F008	PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

FEDERAL ASTM RECORDS:

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA/NTIS

Telephone: 703-413-0223

CERCLIS: CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/30/97

Date Made Active at EDR: 06/30/97

Database Release Frequency: Monthly

Date of Data Arrival at EDR: 05/19/97

Elapsed ASTM days: 42

Date of Last EDR Contact: 05/12/97

ERNS: Emergency Response Notification System

Source: EPA/NTIS

Telephone: 202-260-2342

ERNS: Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 03/01/97

Date Made Active at EDR: 06/24/97

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 04/10/97

Elapsed ASTM days: 75

Date of Last EDR Contact: 04/07/97

NPL: National Priority List

Source: EPA

Telephone: 703-603-8852

NPL: National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC).

Date of Government Version: 04/01/97

Date Made Active at EDR: 05/29/97

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 04/21/97

Elapsed ASTM days: 38

Date of Last EDR Contact: 04/03/97

RCRIS: Resource Conservation and Recovery Information System

Source: EPA/NTIS

Telephone: 800-424-9346

RCRIS: Resource Conservation and Recovery Information System. RCRIS includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Date of Government Version: 04/01/97

Date Made Active at EDR: 06/30/97

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 04/25/97

Elapsed ASTM days: 66

Date of Last EDR Contact: 02/27/97

CORRACTS: Corrective Action Report

Source: EPA

Telephone: 800-424-9346

CORRACTS: CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/01/96

Date Made Active at EDR: 03/03/97

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 12/30/96

Elapsed ASTM days: 63

Date of Last EDR Contact: 04/07/97

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

FEDERAL NON-ASTM RECORDS:

CONSENT: Superfund (CERCLA) Consent Decrees

Source: EPA Regional Offices

Telephone: Varies

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: Varies

Database Release Frequency: Varies

Date of Last EDR Contact: Varies

Date of Next Scheduled EDR Contact: N/A

FINDS: Facility Index System

Source: EPA/NTIS

Telephone: 703-908-2493

FINDS: Facility Index System. FINDS contains both facility information and "pointers" to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 09/30/95

Database Release Frequency: Quarterly

Date of Last EDR Contact: 05/05/97

Date of Next Scheduled EDR Contact: 08/04/97

HMIRS: Hazardous Materials Information Reporting System

Source: U.S. Department of Transportation

Telephone: 202-366-4526

HMIRS: Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/95

Database Release Frequency: Annually

Date of Last EDR Contact: 04/28/97

Date of Next Scheduled EDR Contact: 07/28/97

MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission

Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 01/15/97

Database Release Frequency: Quarterly

Date of Last EDR Contact: 04/14/97

Date of Next Scheduled EDR Contact: 07/14/97

NPL LIENS: Federal Superfund Liens

Source: EPA

Telephone: 205-564-4267

NPL LIENS: Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/91

Database Release Frequency: No Update Planned

Date of Last EDR Contact: 05/29/97

Date of Next Scheduled EDR Contact: 08/25/97

PADS: PCB Activity Database System

Source: EPA

Telephone: 202-260-3936

PADS: PCB Activity Database. PADS identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 01/27/97

Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 05/20/97

Date of Next Scheduled EDR Contact: 08/18/97

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RAATS: RCRA Administrative Action Tracking System

Source: EPA

Telephone: 202-564-4104

RAATS: RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/95

Database Release Frequency: N/A

Date of Last EDR Contact: 06/16/97

Date of Next Scheduled EDR Contact: 09/15/97

ROD: Records Of Decision

Source: NTIS

Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 03/31/95

Database Release Frequency: Annually

Date of Last EDR Contact: 06/02/97

Date of Next Scheduled EDR Contact: 09/01/97

TRIS: Toxic Chemical Release Inventory System

Source: EPA/NTIS

Telephone: 202-260-1531

TRIS: Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/92

Database Release Frequency: Annually

Date of Last EDR Contact: 03/04/97

Date of Next Scheduled EDR Contact: 06/30/97

TSCA: Toxic Substances Control Act

Source: EPA/NTIS

Telephone: 202-260-1444

TSCA: Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site. USEPA has no current plan to update and/or re-issue this database.

Date of Government Version: 01/31/95

Database Release Frequency: Annually

Date of Last EDR Contact: 06/16/97

Date of Next Scheduled EDR Contact: 09/15/97

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

STATE OF MINNESOTA ASTM RECORDS:

LUST: Leak Sites

Source: Minnesota Pollution Control Agency
Telephone: 612-297-8563

LUST: Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 01/15/97
Date Made Active at EDR: 05/05/97
Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 03/31/97
Elapsed ASTM days: 35

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LCP: Closed Landfills Priority List

Source: Minnesota Pollution Control Agency

Telephone: 612-296-6706

LCP: The Minnesota Legislature enacted a law to manage and clean up the state's closed Mixed Municipal Solid Waste Landfills. Under that law, the MPCA is required to create and periodically revise a priority list of qualified landfills, based on the relative health and environmental risks they present. The MPCA established the first such priority list in December, 1994.

Historical and Other Database(s)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Former Manufactured Gas (Coal Gas) Sites: The existence and location of Coal Gas sites is provided exclusively to EDR by Real Property Scan, Inc. ©Copyright 1993 Real Property Scan, Inc. For a technical description of the types of hazards which may be found at such sites, contact your EDR customer service representative.

Disclaimer Provided by Real Property Scan, Inc.

The information contained in this report has predominantly been obtained from publicly available sources produced by entities other than Real Property Scan. While reasonable steps have been taken to insure the accuracy of this report, Real Property Scan does not guarantee the accuracy of this report. Any liability on the part of Real Property Scan is strictly limited to a refund of the amount paid. No claim is made for the actual existence of toxins at any site. This report does not constitute a legal opinion.

DELISTED NPL: Delisted NPL Sites

Source: EPA
Telephone: 703-603-8769

DELISTED NPL: The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

NFRAP: No Further Remedial Action Planned

Source: EPA/NTIS
Telephone: 703-413-0223

NFRAP: As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

FRDS: Federal Reporting Data System

Source: EPA/Office of Drinking Water

Telephone: 202-260-2805

FRDS provides information regarding public water supplies and their compliance with monitoring requirements, maximum contaminant levels (MCL's), and other requirements of the Safe Drinking Water Act of 1986.

Area Radon Information: The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

Oil/Gas Pipelines/Electrical Transmission Lines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines and electrical transmission lines.

Sensitive Receptors: There are individuals who, due to their fragile immune systems, are deemed to be especially sensitive to environmental discharges. These typically include the elderly, the sick, and children. While the exact location of these sensitive receptors cannot be determined, EDR indicates those facilities, such as schools, hospitals, day care centers, and nursing homes, where sensitive receptors are likely to be located.

USGS Water Wells: In November 1971 the United States Geological Survey (USGS) implemented a national water resource information tracking system. This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on more than 900,000 wells, springs, and other sources of groundwater.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1994 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Water Dams: National Inventory of Dams

Source: Federal Emergency Management Agency

Telephone: 202-646-2801

WATER DAMS: National computer database of more than 74,000 dams maintained by the Federal Emergency Management Agency.

An aerial photograph of a city grid, showing streets, buildings, and vegetation. A white rectangular label is placed over the center-left portion of the image. The label contains handwritten text in black ink. The background image is a high-contrast, black and white aerial view of a city, likely from the late 20th century, showing a dense urban layout with a grid of streets and various building footprints. The label is positioned over a section of the city grid, partially obscuring some of the details. The text on the label is handwritten and includes the year '1980', a north arrow, and a scale.
